

with thanks the indebtedness for some of the facts given in this short sketch to Dr. Canniff's work on "The Medical Profession in Upper Canada." Also to several of the Deans and Secretaries of Medical Colleges, and Registrars of Medical Councils and Boards, etc., for information bearing on Medical education in different sections of the Dominion.

---

NOTE.—Trinity Medical College has a record of thirty years of successful teaching in every Department of Medical Science, and upwards of 1,300 of her graduates are scattered over Canada, the United States, as well as wherever the British flag flies—of this, her friends are justly proud.
