30	Thu.	20	46	27	38	23 11	8 13	Hot day this.

JUNE.—The crops for the season being now mostly planted, see that weeds do not devour them. "A stitch in time saves nine" whether applied to pantaloons or potatoes. Destroy the cockle, chess, mustard, and red-root, for these weeds destroy or steal the wheat. Go over the field several times, and let none escape. Plow-in Canada-thistles deeply and thoroughly; continue it once a month during the summer, and by mid-autumn they will be killed and the land ready for wheat. Sow corn for fodder, sowing it thick in furrows plowed two or three feet apart. Sow ruta бага from the first to the middle of the month.
