

(5) That young leaves are less injured than those fully developed, and are more injured on weak trees than on those that are vigorous and healthy.

(6) That Paris green cannot be used alone with safety, stronger than one pound to three hundred gallons of water, but with the lime mixtures it may be safely used at one pound to from fifty to two hundred gallons.

(7) That the foliage is most injured when kept constantly wet by light rains or foggy weather, but that heavy rains lessen the injury.

(8) That the least injury is done when the liquid dries off most rapidly.

(9) That the time of day when the application is made is unimportant.
