

The Roofing That Needs No Painting

Amatite ROOFING

THE Amatite mineral surface will hold its own against the weather for a long time. You don't have to look over your Amatite Roofs to see whether they need painting every year or two.

The cost of paint, therefore, is done away with—all that trouble and nuisance and bother is gone. Simply lay your Amatite, nail it down, take away your ladder and forget that you have a roof.

A sample of Amatite will be sent free on request, together with a handsome little booklet, giving details. Address our nearest office.

Creonoid Lice Destroyer and Cow Spray

Creonoid sprayed on cows keeps away flies. Use it before milking and cows will yield better.

Everjet Elastic Paint

Save money by using this black paint wherever the color is no objection. Elastic, heat-proof, durable. Use it for "rubber" roofings and all exposed iron and wood.

THE PATERSON MFG. CO., Limited
MONTREAL TORONTO
WINNIPEG VANCOUVER
St. JOHNS, N.B. HALIFAX, N.S.

The scene was the golf links, and the parson and the doctor were having a friendly match—at least, the match had been friendly till the former found himself seven down at the ninth hole. In fact, the parson was taking his beating badly.

He kept thinking of all the things he ought not to say, and the medico, guessing his feelings, chortled audibly.

"My hole again!" said the doctor, for the tenth time, as he holed out a fourteen-yard putt.

His reverence could not contain himself any longer.

"Sir," he burst out, "I hope I may live to read the Burial Service over you!"

"Indeed!" said the doctor, with a dry chuckle. "Well, it would still be my hole!"

GOSSIP.

PERCHERONS FOR CANADA.

Gerald Powell, Nogent-le-Rotrou, France, writes "The Farmer's Advocate": "On July 15th, I shipped from Havre, 12 mares for Alberta, and for T. H. Hassard, of Markham, Ont., 14 stallions and mares, an extra good bunch, both in stallions and mares, there being several prizewinners, including Jonas 87160, a black three-year-old stallion, bought off Victor Guibout, a winner at several shows, also an extra good two-year-old gray stud, Kartonnier, who won fifth prize at Alencon, the Percheron Society Show, there being 81 in the ring. No doubt these horses will be shown at Toronto next month."

A NOTED HERD OF IMPORTED SCOTCH SHORTHORNS.

With their 1912 importation of Scotch Shorthorn bulls and heifers safely landed in their splendid stables at Burlington, Ont., the firm of Mitchell Bros. are in a position to supply the Shorthorn breeders of Canada with either an imported or Canadian-bred stock bull, a position not duplicated by any other firm of breeders or importers in the country. It is now many years since J. F. Mitchell first crossed the briny frog-pond for Shorthorns, and since then many importations have been made, particularly of late years, when Mr. Mitchell has been almost the only Canadian with the courage to delve into importing of Shorthorns with the high prices in vogue in Scotland. With their large herd of something over one hundred head of imported cows, their daughters and granddaughters, and a number of recently-imported heifers, bred on the most fashionable tribal lines to select from, the firm are in a particularly favorable position to meet the demands of the breeders of this country in either imported or Canadian-bred cows, heifers, or bulls, and that this fact is being fast recognized is well proven by the large and rapidly-increasing number of sales of breeding and show animals that every year brings. In high-class show condition and individual excellence the herd was never so strong as just now. It was a master stroke of judgment exhibited by Mr. Mitchell when he selected as chief stock bull, from the renowned herd of A. T. Gordon, the immensely thick, mellow, good-doing bull, Imp. Bandsman, of the breed's best-doing tribe, the Cruickshank Butterfly. This bull has proved a veritable wonder as a sire of show-ring calibre. In service and for sale, as some of them are, are such high-class and richly-bred bulls as Imp. Royal Warrant, a Campbell Rosebud, and a half-brother to Bandsman, being sired by the famous show bull, Newton Chrystal. He is a roan, deep-ribbed, well-fleshed, and a beautiful handler. Another, same age, senior yearling, is Right Sort (imp.). He is a roan Bruce Mayflower, bred by Gordon, and sired by Red Rosewood. This is a show bull all over. Another, same age, is a red, Newton Friar (imp.), a Marr Flora, bred by Duthie, and sired by Violet's Victory. He is a bull of grand type and quality. Another senior yearling that has show-ring championship form, is the white, Bandsman's Choice, a Duchess Gwynne-bred son of Imp. Bandsman. This is one of the greatest senior yearling bulls in the country. The younger bulls for sale are the best lot ever bred in the herd. There is not a cull among them. One is a roan nine-months-old Duchess Gwynne, by Bandsman; another is a red C. Butterfly, by Bandsman; another is a roan Nonpareil, by Bandsman; two others are Orange Blossom-bred sons of Imp. Village Duke, and still others are Lavinia-bred sons of Imp. Village Duke. These, with several others, make a selection of high-class young bulls whose individuality and breeding cannot be beaten. The same standard of excellence is manifest in the female side of the herd. Many of them are in fit for Toronto and London shows, where the Messrs. Mitchell will be pleased to show them to interested breeders. Look them up at Toronto and London Exhibitions.

She—"Pardon me, sir, for walking on your feet."
He—"Oh, don't mention it. I walk on them myself, you know."

Is Your Purse Full?

YOUR farm is the purse from which you take the necessities and luxuries of life. What provision are you making to keep your purse full—to insure a constant supply of food, clothing, heat, light, protection, and worldly wealth?

No purse can stand a steady drain—no soil can produce constant yearly crops—without an adequate income. The purse must be supplied with money, the soil with plant food. It is easier, and far cheaper, to maintain a fertile condition of the soil than it is to build it up after it is once exhausted. Be wise—begin now to use faithfully an

I H C Manure Spreader Corn King, or Cloverleaf

Use your I H C spreader to distribute stable manure and saturated bedding while it is still fresh. Spread in light coats so that the plant food elements of the manure may combine quickly and thoroughly with the soil and become available for the use of growing plants. Spread quick-decaying straw to increase the moisture holding capacity of the soil.

If you would have the spreading well done, do it with an I H C manure spreader. Make the quantity of manure usually spread by the fork do twice the amount of good by distributing it properly with an I H C spreader, leaving the ground more evenly fertilized. The driving mechanism of the I H C spreader is strong and thoroughly protected. The aprons, both endless and return, run on large rollers. The feed is positive. The manure is spread evenly, light or heavy as may be necessary, the quantity spread never changing until the feed is changed.

See the I H C local agent and have him show you the spreader best suited to your needs. Get catalogues and full information from him, or write the nearest branch house.
