## Thrifty Pigs.

Pigs are naturally hardy, though many feeders think otherwise, and these same feeders feed their pigs in exact opposition to nature's plan. Nature has built the pig in such a way that he is able to digest almost anything, provided he can get nature's aromatic aids to digestion, which are contained in the roots, herbs and berries of the forest. Give him these and he will not need a great deal of exercise, he will put on solid flesh rapidly, and you may force him without danger of soft bacon.

Herbageum is an aromatic preparation that simply adds in the assimilation and digestion of food, and can safely be relied on to economically produce firm, sweet, lard and bacon, and when fed regularly from the time of weaning, pigs at five months will be as good as pigs ordinarily at seven.
