You my experience.

I have not very much to say that is new, but there is one thing I might say that may be of interest to others, and that is something about Lucerne or Al'alfa. I am greatly taken with this clover. It is a comparatively new thing in Canada; comparatively few farmers are growing it. Some few have tried it and have not been successful. I have been growing it in a small way for eight years and have only just now been growing it in a small way for eight years and have only just now learned how to grow it successfully. I have now about twelve acres growing, and last year and this year's seeding has been very successful, more particularly this year's. I seeded down eight acres, and all but two are doing splendidly, the finest I ever saw, just beautiful, as thick on the ground as it can stand, with no weeds. I sowed about the 10th of May and cut for the first time about May and cut for the first time about the 5th of July, when eight to ten inches high, and now (20th July), it is from six to eight inches high again, and the prettiest field of

over you ever saw.
One field that I seeded down last year I cut on the 20th of June this year, when it was 30 inches high, and it yielded seven tons of green feed to the acre. I cut a second crop on the 15th of July, but owing to the very dry time—no rain between first and second cutting—it did not turn out so well, only 3% did not turn out so well, only 3½ tons of green feed to the acre. But since then we have had a good tons of green feed to the acre. But since then we have had a good heavy rain and it is growing very rapidly, and in three weeks, or about the middle of Angust, I will have another heavy crop, the third cutting, and a fourth cutting about the first of October. One lot of last year's seeding I cut for hay about the 26th of June, which weighed 21-8 tons of dry hay to the acre, and in two weeks more we shall have a second crop equally as good, and about the middle of September is said to be a very rich feed.

As a Soiling Crop. cut some of the Alfalfa every other day and feed it green to our 800 logs and 65 mileh cows, and I believe it to be the finest green feed in the worki for soiling purposes, either for pigs or cows. It is the very cheapest and the best feed one can grow; hogs are particularly fond of it, as well as the cows, and it is said to be a very rich feed.

the author states that one ton of Alfalfa hay is worth as much as four tons of timothy, and two tons of com-mon red clover, and a ton of the

Good Brown Bread.

One cup of sour cream, one cup of

molasses, one cup of seeded raisins, one quart of graham flour, one teaspoon of soda, one teaspoon of salt.

Butter a round baking dish and pour in the batter. Steam three hours and

Chicken Pie.

Take two full-grown chickens, or

nore if small; disjoint them, cut ackbone, etc., small as convenient. oit them with a few slices of salt

Bolt them with a few slices of salt pock-in water enough to cover them: let them bolt quite tender; then take out the breast bone. After they bolt and the seum is taken off, put in a little onion cut very fine—not enough to taste distinctly, just enough to flavor a little! rub some passley very fine when dry, or cut this when green—this gives a pleasit flavor. Season well with pepper and salt, and a few ounces of good tresh butter. When all is cooked well, have leadled enough to cover the

dwell, have liquid enough to cover the chicken, then beat two eggs, and stir dn some sweet cream. Line a five-quart pan with crust made like soda obscult, only more shortening.

biscult, only more shortening: put in the clicken and liquid, cover with crust same as the lining. Bake till crust is done, and you will have a good clicken pie.

Delicious Relish.

up the bread or pudding.

in the oven a few minutes to

The great trouble or the cause of lack of success with Alfalfa in this lack of success with Alfalfa in this country is in getting it to graw, that is in getting it to graw, that is in getting it started the first year. Not one farmer in a hundred knows how to grow it, and nine-tenths of those who have tried it have made a failure. The great secret is to have the land thoroughly prepared for it. The land must be thoroughly worked the year before sowing so as to kill all weeds, and early in the follow ng spring cultivated, harrowed and roiled a great many times so as to get a perfect seed bed. Barn yard manure should not be put on for at least a year before sowing as it will cause weeds to grow, but commercial fertilizers should be used. When to sow. When to sow.

It is best to sow the seed as early in the spring as the land can be got into shape, but better to sow a little later than to sow wheal the land is in bad condition or not properly worked. Sow broadcast, thirty peunds of seed to the acre. It is better to go over the land twice, once each way swing helf the errort of each way, sowing half the amount of seed each time. We use the wheel-barrow seeder. After sowing roll the land down firm, and then go over it and down firm, and then go over it with a light harrow or a weeder, and when the Alfalfa is up six or eight inches high it should be cut with the

inches high it should be cut with the mower, but not very close to the ground. This is to check the weeds, and also causes the Alfalfa to grow stronger and healthier.

I have always grown Alfalfa on dry, sandy, soil until this year. I have one acre on a heavy clay loam inclined to be a little damp, and the Alfalfa is doing better there than on the sand. I am experimenting with different kinds of soil and different times of sowing, with and without a nurse crop, and find it does much better sown alone without a nurse crop. If sown with a nurse crop barley is the best and that should be cut before it gets ripe for green feed; but Alfalfa is better alone without any grain.

When to Cut.

Alfalfa should never be allowed to go to seed, as that would run it out yery quickly. If properly managed it will grow for eight or ten years, the roots going down eight or ten feet. It will stand the drouth better than any other clover. For hay it should be cut townsents. be cut very early, as soon or before o be a very rich feed.

new book on Alfalfa, published hay will be woody and not nearly it begins to blossom, otherwise the new book on Alfalfa, published hay will be woody and not nearly so good. In curing Alfalfa for hay it Kansas Agricultural College, thor states that one ton of hay is worth as much as four timothy, and two tons of companions of the property of the propert tons of timothy, and two tons of common red clover, and a ton of the leaves is worth more than a ton of wheat bran, and that if you feed then handle as little as possible, or the winter you do not require to of it, will drop off.

OF THE WISE HOUSEWIFE.

PROSESTED PROSESTA DE COMO POR ESTA POR

Science in the Kitchen:

JAPANESE WIVES.

A married woman's lot in Japan s anything but a pleasant one, at east according to Occidental ideas. apanese women inherit no fortunes and in families including no son, one is adopted by the parents as heir. The only dowry a girl is given for aer marriage is her dresses, a little writing desk, a work basket, a box of cosmetics and other toilet articles, two little dining tables, and a

ew lacquer plates.
On his marriage a man remains as free as ever before. He has no fresh duties to consider. He can do exactly what he chooses. If he likes, he can spend every evening out of the house. The women among the poorer classes are still more to be pitted. A workman marries a women when it entit man marries a woman waen it suits him, and changes her with as little fuss as we change our clothes. These

Tuss as we change our clothes. These exchanges, or what we call divorces, take pince less frequently in the better classes.

A man can obtain divorce for the fell wing reasons: Disoboxience, Jalany, incurable illness, talkativeness, etc. The wretched weman, divorced, must return to her parents and leave her children with her husband.

On entering the husband's home the Japanese bride does not become mis-tress of the household. She becomes the servant of her husband's parents, the servant of her husband's parents, and her husband cannot—does not—shield her from the maggling tongue of a mother-in-law. When the parents are dead, the wife directs the household, but she is still only her husband's principal servant. In public she hardly ever appears in his company; at home she does not even sit at the same table with him! He takes his meals alone, while she waits. His wishes are commands which she obeys willingly and amiably. She helps him to dress, she washes and mends his to dress, she washes and mends his clothes; she is even proud to do that for him which would otherwise be left to servants. The Empress her-self is not exempt from such service, but waits in various ways on her Emperor-husband.

TALES ABOUT HEREDITY.

Doctors disagree as to the influence of heredity, says the New York Sun. Some hold that a great deal hinges upon it; others believe

the outrary.

There was a loan collection of old portraits exhibited in London lately and a young girl was among the visitors. She was an orphan and wealthy, but without near relatives. As she passed through the gallery one particular portrait attracted her attention, and she went back to it more than once.

"It is such a kind face," said the

"It is such a kind face," said the girl, rather wistfully, "I imagine my father might have looked like that had he lived."

As most of the pictures were tickeded the visitors had purchased no catalogue, but, before going away, Miss B. bought one at the entrance and made a last visit to the portrait for which she had felt so strong an attraction. To her astonishment she found her own name opposite to its number and learned on inquiry o its number and learned on inquiry that the original was one of direct ancestors.

Another occult coincidence of psychological phenomenon happened a few years ago to a Southern states-man and financier, whose family had always been of rank in his native State. This gentleman was over-hauling old documents and letters which had been stored in a musty chest for years and intended to publish any of value.

To his surprise he unfolded a let-

ter, yellow and time-stained, which was written in his own peculiar hand-writing, or seemed to have been written by him, atthough the date was two generations before his birth. The signature of the surname, which was the same as his own, was so markedly characteristic that he could scarcely believe his own hand did not pen the letters.

olives as a luncheon relish is worth rown on the top. Never remove the op of the steamer until ready to dish staunch old remedy, Perry Davis' Painkiller, and get rid of the pest in twenty-four hours. 25 and 50 cents.

Arnprior, Oat., Feb. 10.—(Special.)
—A very remarkable cure of Backache and Kidney Trouble has just been brought to notice at Basin Depot, near here.

Mr. J. H. Martin, suffered for over eighteen years with Lame Back so that he actually couldn't walk or le down without enduring the most dreadful pain. He tried many medicines without getting rali.f, and was very much discouraged.

Dodd's Kidney Pills were recommended to him, and he commenced a treatment, and improvement increased until he was able to go about his work as well as ever.

The theory so often advanced that the Kidneys are the most important organs of the body and that a large perfect kidney action seems to be amply proven in this particular case, for as seon as Dodd's Kidney Pills have been published, but certainly none as wenderful as that of Mr. Martin.

He has written a letter giving the facts of his case and his aurous of the sidneys and has aurous at that of Mr. Martin.

He has written a letter giving the facts of his case and his aurous of the sidneys and has aurous the bear and the original of the cheef and, it being the general opinion that there is no return for the person sent, the held that the lead of the master assembles a court of the chief, and, it being the general opinion that there is no return for the person sent, the held that the case of the case of the sidneys all Mr. Martin's troubles left him at once.

Many remarkable cure by Dodd's Kidney Pills have been published, but certainly none as wonderful as that of Mr. Martin.

He has written a letter giving the facts of his case and his aurous of his person here.

juju,' and he then proceeds on his journey, under the care of a juju man, who, the natives affirm, conducts him, blindfolded and by a circuitous route, to the fatal spot. What eventually takes place has never been divulge l, and the popular accounts have replace has proceed to the propular accounts have replaced to heaver seen. accounts have probably been spread by the chiefs to overawe their slaves. The supreme judge is said to be a priestess possessed of the power of knowing all things. When brought before her the offender is merely told knowing all things. When brought before her the offender is merely told that he can depart; if guilty he becomes transfixed to the spot, and water gradually rises around him until he is submerged. Another version is that the place is situated on an island, and that the victim, on being handed over by his conductor, goes through some form of mosk trial abstraction. through some form of mock trial, alon he is east alive into a luge tank of boiling human blood. Juju men stand around armed with two-edged swords, with which they hack the body to pieces and stir up the contents of the tank."—St. James Gazette. zette.

Kilmarnock Stories. An old gentleman, a stranger to Kilmarnock, was looking for could tell him wh ay, 'says he. 'Ye kea my grannie's? Weel, it's just twa doors ayont it." Weel, it's just twa doors ayout it." Grannies are rather taken the loan of sometimes. A boy of the 'cute class thought he weal! puzzle his grandmother. "Grandma," says he, "do you know how we now get the inside out of an egg without breaking the shell? It's this way, you know. We first perforate an aperture in the apex of the egg, then we perforate a corresponding aperture in the base of the egg, and then by a violent inhalation of our breath we drain the egg of its contents," "Lo'd, that bates a'," said grannie: "when I was young we just bored a hole at I was young we just bored a hole bath ends and sookit it!"

..... ISSUE NO.

Barnum's Monkeys

"All well-all happy-lots of fun". That is the regular report from the monkey cage of Barnum's Circus ever since the keepers began dosing the monkeys with Scott's Emulsion. Consumption was carrying off two thirds of them every year and the circus had to buy new ones.

One day a keeper accidentally broke a bottle of Scott's Emulsion near the monkey cage and the monkeys eagerly lapped it up from the floor. This suggested the idea that it might do them good. Since then the monkeys have received regular doses and the keepers report very few deaths from consumption. Of course it's cheaper to buy Scott's Emulsion than new monkeys-and that suits the circus men.

Consumption in monkeys and in man is the same disease. If you have it or are threaten-

ed with it can you take the hint?

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.
