TOWN ORGANIZES FOR REFERENDUM

A meeting of the citizens of Newcastle was held on Tuesday afternoon at three o'clock in the Town Hall to organize for the referendum on Prohibition which is taking place July 9th or 10th.

Rev. Thomas Marshall, organizer for the N. B. Temperance Alliance was present, also Donald Fraser, President of the N. B. Temperance Alliance, and gave interesting addresses as to the wonderful benefit which has been derived since the Prohibition Act went in force, and they also explained the work which would have to be done before the referendum takes place, in order that a large majority for Prohibition be secured when the vote takes place in July.

Rev. L. H. MacLean, E. A. McCurdy, Rev. E. A. Kinley, T. A. Clarke and others also spoke of the work in hand, and organization was proceeded with. The following executive committee was then appointed:

Chairman—E. A. McCurdy

Secretary—F. E. Locke

Other members of the executive are Andrew McCabe, T. A. Clarke, Mrs. S. A. Demers, Mrs. C. C. Hayward, Mrs. T. A. Clarke, Mrs. Dr. Nicholson, James Stables, J. E. T. Lindon, and the executive was also given power to add to their numbers. The executive meets shortly to draw up their committee, and it is hoped that the people of Newcastle and surrounding Parishes will give their heartiest support in favor of the Prohibition Act when vote is taken in July.

TARVIA PLANT EXPECTED DAILY

The Carville Co. which have charge of the new tarvia road from Chatham to Newcastle, are putting an early start on their contract. The plant was shipped last week from St. John, and is expected here every day now, and when it arrives the work will be commenced at once from the Chatham end and will go steadily forward as fast as circumstances will permit.

The Tarvia road is a real permanent roadbed with a surface that is quickly and easily renewed every few years or so often as it wears and is the cleanest and most satisfactory road yet devised for all classes of traffic. With the extraordinary conditions that existed here in regard to the granite supply this road will probably cost \$25,000 per mile. As about 20,000 tons of granite are needed for this road work, the local supply was totally inadequate and granite for the foundation of the five mile stretch of road is being brought from the Miramichi quarry Co's property at Quarryville and with this long haul is an exceptionally expensive item in the cost of construction.

Legislation To Meet Newsprint Needs

Ottawa, June 6.—The Citizen tomorrow will say that the Dominion Government will introduce legislation this week compelling Canadian makers of newsprint paper to supply fifteen per cent of their total output to Canadian publishers, this being sufficient for the needs of the news papers of this country. The bill to be introduced, the paper states, will not fix the price.

A meeting of the Daily Newspaper Association Saturday asked the Government to pass legislation forcing the mills to keep them supplied at prices not higher than current export rates.

MIRACULOUS ESCAPE

A miraculous escape from serious injury or even death was recorded here on Monday last, when a car driven by Mr. Walter Amy, with Mrs. Amy and two children and Mrs. C. C. Hubbard as passengers, backed over the bank at Lower Mill Cove and made a drop of about twenty feet into the brook below. Mr. Amy was unable to make the jump on the lower side of the hill and was backing up for a start when the car became unmanageable and backed over the bank. Nobody but the occupants suffered a scratch but, needless to say, the latter had very bad cases.

Salmon Fished Out In Fraser River

Vancouver, B. C. June 6.—The run of sockeye salmon in the Fraser River one of the greatest salmon rivers in the world, no longer can be called "great," declared J. T. Babcock, assisting commissioner of fisheries for British Columbia, in addressing the Canadian Fisheries Association convention here Saturday. "The Fraser is fished out," he said, "and this condition is a monumental record of man's folly and greed. The only redeeming feature is that it is not too late to take steps to restore the Fraser to its former greatness."
