A white satin evening coat is embroidered in crystals and colored stones, and luxuriously trimmed with ermine.

The newest flat tailored silk handbag is lined with bright red leather. The leather gives the effect of a piping around the edge.

Even long gloves are novel—they edge the seam with wee-pleated ruffles, or have bands of pleated material of contrasting color.

The Choice of Society.

Three Flowers toilet requisites have been unhesitatingly accepted by the most charming ladies of Society as the most beautiful aids to a perfect appearance. The faint fragrance of the lovely Three Flowers odor is only one of the many appealing qualities of this dainty perfume which is incorporated into all the Three Flowers aids to beauty. The Talcum is distinctive and altogether fascinating. The Face Powder possesses a rare charm. The Vanishing Cream is so fragrant—so appealing that its users experience a new delight every time the cover is removed from its dainty container. We have all the Three Flowers preparations in stock now.

Measuring by Echo

HOW THE BED OF THE OCEAN IS MAPPED.

When sound vibrations pass through water and strike a solid surface, they return as an echo to the point from which the sound started. Working on this fact soundings of the ocean can now be taken without the old laborious methods of plumb-line and depth, and it is a simple matter to find the depth of the unsounded parts of the sea.

A sound signal is sent out from one of the sound oscillators invented for use by submarines, and when the vibrations strike the bottom of the ocean they return to the ship from which they came, and are picked up by a sound receiver, fitted with a sensitive microphone.

As the velocity of the sound waves is already known, the observer has only to note the time taken between the sending and receiving of the signals to have a record of the distance travelled by the signals to the bottom and back. On dividing that distance he has the depth at that point.

During a trip of nine days in the Atlantic a ship took nine hundred such soundings, and the observers were able to make a map of the ocean bed below, showing the mountains and valleys beneath, which are just as irregular as the earth's surface.

GENERAL MOTORS.

Pres. Sloan Optimistic—Believes Automobile Prices Are At The Low Level.

NEW YORK, June 4.—President Sloan of General Motors Corporation says: "Business will go ahead on a constructive basis if President Coolidge is nominated and the general feeling is that he will be elected. Business men remember the experiences of 1920 and will not be caught again."

with large stocks in times like this. Stocks are low, and when business picks up it will come back rapidly. "Figuring the period from to-day to a year ago, our company's showing is on a level with the corresponding preceding period. However, there has been a tapering off in the last few months."

"Automobile prices, I believe, are at the low level. Prices tend to increase with better values to be offered. Stocks of automobiles on hand are being liquidated, and by July or August they will have been pretty well exhausted. There will be no bargain sales of automobiles."

"Production is gauged to meet the requirements of the trade. One of the big troubles in the automobile business is that dealers and manufacturers all have the habit of expecting business every year to be far in excess of that of the preceding year."

COTTON OPINION.

S. M. Weld and Co., say: We believe purchases can be made on reactions for at least scalping profits.

Hubbard Bros. say: In our opinion the trade will buy rather freely on all these declines and we do not believe this decline will go very much further.

S. B. Chapin and Co. say: It now looks as though there will be some further decline in prices from the effects of the present better weather conditions in the cotton belt.

Thompson and McKinnon say: Would prefer the buying side on the break.

TO-DAY'S MESSAGES.

VOLCANO'S ACTIVITY CONTINUES.
HONOLULU, June 11.

Kilauea's renewal of activity continues. There were four violent earthquakes in the region near the volcano yesterday at four hour intervals, and the emission of steam, notable for several days, still goes on. The fall of sections of the crater lip into the depths below has ceased again, however.

THE RECURRING THIRTEEN.
PARIS, June 11.

The Presidential tri-color to-day dropped temporarily from the mast of the Elysee Palace when M. Millerand, for nearly four years the chief executive of France, resigned and became a private citizen of the Republic. Sometime between four and seven o'clock on Friday, the thirteenth, the colors of a new President elected by the thirteenth Legislature will be raised to the flagstaff of the Presidential mansion. The new chief executive will immediately proceed to the formation of a cabinet to succeed the present ministry of thirteen members. Of the Presidential possibilities thus far mentioned M. Painleve, President of the Chamber of Deputies alone is said to be superstitiously inclined. To-night, however, he is declared to be leading for the Presidential post.

NEGOTIATIONS FOR GRANTING A CREDIT COMPLETED.
NEW YORK, June 11.

The United States bankers to-day completed negotiations for granting a credit of \$25,000,000 to the German Gold Discount Bank organized by Dr. H. Jalmar Schacht after an initial advance of \$5,000,000 made six weeks ago. The International Acceptance Bank, which negotiated the loan, announced that all the banks constituting the original syndicate including the leading institutions of New York, Boston, Chicago and Philadelphia were interested in the new credit, and that the group had been widened to embrace 34 banks covering the main centres of the United States. Enlargement of the original credit, it was indicated in the financial district, was due partly to the delay in the flotation of the International loan to Germany although the syndicate had contemplated increasing its advances to Dr. Schacht's bank.

GRADUATION OF N.F.L.D. NURSES.
MONTREAL, June 11.

Thirty-six Nurses will receive their graduation diplomas from the Montreal General Hospital to-morrow afternoon. Included among them are Eliza Kirby, Harbor Buffett, Nfld., and Pearl Snow, St. John's, Nfld.

ARGENTINE PAYS ITS LEAGUE DUES.
GENEVA, June 12.

The League of Nations received from the Argentine Government \$2,285,000 Swiss Francs in payment of that country's membership dues for five years ending 1923. This has caused much satisfaction chiefly because it is interpreted as revived interest by Argentina in the League. It is hoped in council circles that the Buenos Aires Government will send a delegation to the September Assembly.

CANCER DEATH RATE INCREASES.
NEW YORK, June 12.

Mortality from cancer continued to increase at alarming rate during 1923 and the number of deaths per year from the disease in continental United States probably now is about 110,000 as compared with 75,000 ten years ago.

Prices Still Further Lowered

Another shipment of Running Shoes has just been opened up, and we are glad to announce a rearrangement of prices, all in your favour. Vast stocks are responsible for these special price revisions.

Shipping

S.S. Sable I. is leaving Boston for Halifax on June 17th.
S.S. Silvia leaves New York on June 21st. The Rosalind leaves on Saturday, June 14th.
Schr. Gertrude, 11 days from Iceland in ballast has arrived in port to T. H. Carter & Co.
Schr. James & Stanley has entered at Grand Falls to load codfish for Oporto from S. Harris, Ltd.
S.S. Diana has sailed from Aquathuna for Bell Island with 14,000 ties of board.
Schr. Flora Nickerson has arrived at St. John's from the Banks with 450 qtls. codfish.
S.S. Hangerlid has arrived at Aquathuna with a miscellaneous cargo.

Here and There.

CAPLIN AT TORBAY.—A few caplin were landed at Torbay yesterday and one man secured about a barrel. The water was rough this morning and none were taken. There is a good sign of fish but they are of a small size.

ON THE LOCAL GROUNDS.—Owing to disagreeable weather very few boats are fishing on the local grounds, some of the fish brought in this morning for disposal in the markets were of fair size. The fishermen are using bare jiggers.

GLENCOE HERE AND GONE.—S.S. Glencoe arrived in port from the West Coast at 5:10 p.m. yesterday, and sailed on the same route at noon today. The Glencoe goes as far west as Port aux Basques, after connecting with to-morrow's train at Argentina.

S.S. CEUTA LEFT MONTREAL.—The steamer Ceuta of the Murray Transport Co., Ltd., left Montreal with a full general cargo on Tuesday last. The steamer before coming to St. John's will call at Corner Brook to land machinery for the Armstrong Whitworth Co.

Electric Clock

TIMES AND PHOTOGRAPHS RUNNERS.

A huge electric clock with three dials, said to record time to one thousandth of a second, has been invented for important athletic contests such as the Olympic Games this summer. It can be connected with a camera so that a picture of the finish of a race is photographed, independently establishing the order of runners, should a difference of opinion arise.

The clock is started by the firing of the starting pistol. Its hands stopped the instant the runner has crossed the finish tape. The clock and hands are so large that the time can be read by many of the spectators yet by means of its three dials it graduated down to record fractions of a second.
