Monkman, of Arkwright, Ont., says: I took inflammatory rheumatism in February, 1894, and doctored for it for some weeks, found I was getting worse. All my joints were swollen very much, and I was not able to leave my bed, and could get neither sleep nor rest. Hearing from a neighbor that she got your Burdock Blood Bitters for her daughter, who had the same disease and it cured her, I purchased a bottle, and after taking about the half of it I found myself recovering, and after continuing it for some time I recovered, but when the cold weather set in this winter I found it returning "She has never thrown anything at B. Realizing that it might cost him his life to stay on the narrow bridge, the young man in an instant picked up his bicycle and threw it into the gully beneath, a distance of about forty feet, and jumped after it. There he was found by some passers-by a few moments later, unconscious, while his wheel was very badly smashed. Medical aid was summoned, and, beyond a few scratches, he is none the worse for his adventure.

St. John Shoe Factories and Tanneries Died Under the High Tax Policy.

During the course of the address of Hon. Geo. E. Foster at the Institute, says the St. John Telegraph, a few weeks ago, an elector, who was evidently indignant at the absence of live issues in the discussion, suddenly shouted:

"Mr. Foster, we had nine or ten shoe factories here a few years ago. Where are they now?" The fact that Mr. Foster was at that moment expanding upon a subject which had no relation to John and its industries made the question somewhat irrelevant at the time, and the inquirer was summarily hustled out of the hall. The question remained unanswered, and it would have remained without a satisfactory answer had the speaker been perfectly in order and sought for information in the most conventional form. Only one boot and shoe factory is now found of the eleven which came to the front in St. John in the period between 1860, when the first was started, and 1889, when the National Policy began to show what it could

The boot and shoe industry is only one of a number which were inaugurated under favorable auspices and flourished for a time until killed out by protection, which made St. John slaughter market for the Upper rovinces. In the year 1875, accordrovinces. ing to statistics furnished to the merchants and manufacturers by Mr. W. E. Everitt, there were no less than 73 shoemaking establishments in the city and county of St. John, employing 1,071 hands. The annual wages paid out amounted to \$262,-000; the raw material used was of the value of \$311,506, and the goods produced were valued at \$717,632. At the same period St. John had five large steam tanneries, in which capiwas invested to the amount of \$189,000. Skins to the value of more than \$75,000 were annually manufactured into leather of the value of more than \$150,000, while the tanneries gave steady work to about hands, whose yearly wages amounted to about \$30,000.

The large factories and the tanneries have alike joined the exodus, while very many of the custom shoemakers have been driven out of business in St. John by cheap labor of French-Canadians in the Upper Provinces. The good old times have gone, and there is no prospect of their return so long as St. John continues to suffer from the effects of Conservative
