FINED FOR TRESPASS

Fred Krantz Appeared Before Squire

On behalf of the striking moiners insertion of the following letter is asked:

We would like to ask "Fair-Play Molder" (2) how he can compete with the foundries of other cities any better under the ten-hour day at \$2.75, than he can under the mine-hour day at \$2.75, than he can under the mine-hour day at \$2.75, which is all we are asking?

He makes the statement that other branches of labor and manufacturers say we made a serious mistake in refusing the advance. That is certainly a very broad statement to make. As regards the manufacturers he may be right; but when he says labor he has made a statement he cannot verify, as labor has said and is saying all the time that we are right.

Again he says it would be impossible to run the molding shop nine hours, while other departments run ten. Does he really mean that, or is he trying to hoodwink the general public to the trun as a separate unit without interfering in any way with other departments.

In nearly all trades the nine-hour day is the rule, and in several the eight-hour day obtains. How have they obtained their shorter hours? Through legislation? We think not. Whenever we have tried to get relief through legislation it has been knocked. By who? Our only hope is organization. That is a funny break of his that because you have only half the year around. How about the printers, pressmen and cigarmakers? They work only eight hours a day. We have looked into this question from both sides and have come to the conclusion that we have been getting the worst of the deal, and as far as disturbing trade conditions are concerned, don't you think there is some fault on the other side? We gave you two months to consider the question and you never said a word until the last day.

SAYS MR. STEEVES

Pastor of Egerton Street Baptist Church Church Talks Plainly to Congregation.

On Excursions.

More than 4,000 Londoners went down to the lakeside on Saturday and spent the day in picnicking. The first party to leave was the employees of the D. S. Perrin firm, and their friends. They had a big special train and estimate that 2,500 people went with them. Two hundred more went down with the employees of Hyman's tannery, and about 400 on the annual outing of the London Printing and Lithographing Company. Besides these big affairs there were numerous small picnices.

The 3 section of the whole thirty-nine. Everybody had the best kind of a time. An anasing feature was taken along for those who didn't care to drink that at Port Stanley. The picnickers were much surprised on their arrival at Port Stanley. The picnickers were much surprised on their arrival at Port Stanley. The picnickers were much surprised on their arrival at Port Stanley when Mr. T. W. McParland, of the Perin firm was called aside by the officials, and led to a big barrel on which was a label "Lake Erle Water. All things are pure to those who doners drank the water which they had taken and mad a most enloyable time. A feature of the Lendon Printing and Lithographing employees ilsed was the baseball game which was as clean a contest as any ever seen at the Port, and was only won after a terrific battle by the lithographiers who defeated the printers by a score of 7 to 6. The batteries for the lithographers were Asitton and Horwood, and for the printers, Scott and Garratt.

tom. The specimen is nearly 30 inches in diameter.

Allicit estimates it is 400,000 years old and beyond doubt the most ancient ever picked up on the western hemisphere. It swam in the seas, he says, when California and all other territory this side of the Rocky Mountains were still a mile or two under water. When the great earth spasm occurred which lifted the peaks of Shasta, Rainier and Whitney out of the depths and brought new land into being, the tortoise undoubtedly perished, and, already petrified, sprobably rolled and ground in the glacial period ice for 70,000 years.

The works of this show clearly one flipper intact. The head and edges of the shell were obliterated. Hundreds of large petrified clams were found imbedded in the shale near the tortoise.

LONDON CONTESTANTS WIN TWO PRIZE PONIES

The three Orange Maize Toasted Corn Flakes ponies which were given as prizes in the contest which ended on June 30th last, were presented to the successful boys in front of the Parliament Buildings, Queen's Park, Toronto, on Monday afternoon, July 10th. The winners were:

First-Cecil Bridle, 451 Dundas Street, London.

Second—Ferris W. Wilson, Norwich.
Third—Raymond C. Dawe, 211 Hamilton Road, London.

They were given their choice of the ponies in the order in which they came in the contest. Young Bridle chose "Queenie," Ferris Wilson picked "Daisy" and Raymond Dawe got "Prince." That they were all delighted, goes without saying.

CECIL BRIDLE.

"I tound selling Orange Maize the easiest thing out," Cecil Bridle said, "People all thought it was the finest Toasted Corn Flakes they ever tasted, and Papa says they will always have a big sale in London. I was playing it the back yard with the nine boys who helped me, and we had a great time when we knew we had won."

Norwich, Ont., Winner of Second Prize, Ferris Wilson was in Ingersoil when the announcement came that he had won. His mother telephoned him, and when he arrived home on the evening train he was met by half the town, who marched in triumphal procession with him to his home on Main street.

"Everybody in Norwich likes Orange Maize better than any other Corn

TORTUISE FOSSIL AGES OLD

Estimated That It Was Alive 400,000

Years Age.

Los Angeles, Cal., July 22. — Three thousand feet above the sea level on the slope of Mount Baldy and 50 miles from the coast, Thomas Donlin has found a perfect fossil of a huge sea tortioise, which Hector Alliot, curator of the Southwest Museum, pronounces the most important discovery of the kind ever made in Southern Callfornia.

Donlin has a bee ranch and was seeking a rock to hold down the lid seeking a rock to hold down the lid seeking a rock to hold down the lid of a hive when he saw a shell prokind ever made in Southern Callfornia,
Donlin has a bee ranch and was
seeking a rock to hold down the lid
of a hive when he saw a shell protruding from the ground. He dug it
up, and it proved a solid stone, weighing 100 pounds, and showing exact
markings and even some of the original color on the back and yellow bottom. The specimen is nearly 30 inches
in diameter.

All the eloquence of

CAPTAIN GENSURED

Tesult of Inquiry Into Accident to the Gunard Liner Ivernia.

[Canadian Press]

London, July 22. — The board of trade's inquiry into the accident to the Cunard steamship Ivernia, which struck on Daunt Rock last May and was badly damaged, resulted today in a severe censure of Captain Potter, though the court found that it was not necessary

The judgment was that Potter improperly navigated his ship at too great speed in thick weather, and neglected to verify his actual position neglected to verify his actual position by lead, but that he was set on the proper course from Old Head of Kin-sale, Ireland. From this course the ship deviated because of an unknown error of the compass, the failure to discover which could not be blamed on the captain. LAST
