THE FRENCH CANADIAN HORSE.

The French Canadian Horse, which is comparatively little known outside the province of Quebec, is claimed to be one of the most durable and otherwise useful horses to be found anywhere in Canada. In bulletin 96 of the Experimental Farms, the author, Mr. Gus Langlois, points out that this breed is descended from the old time French Canadian pony, sent from France to Canada by Louis XIV. These ponies were of the best that could be procured in their native land. They remained for three years the property of the king, and were then distributed among farmers of Canada, in order to encourage the development of agriculture.

Some few years ago the pedigree records for the French Canadian Horse, maintained by the Quebec Government, were transferred to the National Live Stock Records. Other steps have been taken to maintain the breed as pure as possible. One of the latest methods, as pointed out in the bulletin which can be obtained from the Publication Branch of the Department of Agriculture, Ottawa, has been the establishment of a horse breeding farm at St. Joseph, situated some twenty-five miles east of Quebec City. This farm which is operated under the Experimental Farms system has some thirty well selected brood mares. These, together with fifteen of similar quality kept on the Experimental Station at Cap Rouge, Que., form a collection from which it is hoped to produce a superior new foundation stock for the breed.

Identification Mark.
"So you had trouble locating me," said the stranger to the old darkey, as he alighted at the country station. "Didn't our master give you a description of me?"
"Yes, massa, but that's no many gentlemen wif red noses coming on that dar train."

Danger More Distant.
Teacher—Why, Johnnie how can you come to school when your little brother has the scarlet fever?
Little Johnnie—Well, Miss Brown, he's only my half-brother.

SAY FROM NOW ON PRICES WILL BE DOWNWARD

Ottawa, Sept. 25.—While not disposed to definitely commit themselves officials of the Dominion government in touch with matters affecting the cost of living are disposed to the opinion that the tendency from now on will be downward. They point to the steady decrease in the past few months in wholesale sugar quotations, the prospect of a lower price level for such commodities as flour and milk and the announcement that the peak of the cost of clothing has been reached as sure indications that the five per cent. decrease in the family budget indicated in the September report of the department of labor on prices is likely to be followed by further decreases.

TO MAKE BRICKS OUT OF RUBBISH.

New Process Discovered in Paris to Utilize Waste Product.

A notable example of conservation is to be found in the scheme just announced by the Paris Municipal Council for the use of the city's rubbish which is gathered daily in trucks from apartments and buildings. It is proposed to use the rubbish, after it has been heated and then chemically treated until it forms a pulp, to be mixed with chalk found in abundance near the city.

Special mills have been constructed to transform the garbage pulp into bricks for the reconstruction of homes and streets in the devastated regions. Experiments have proved that such bricks have greater wearing qualities than those of ordinary red clay and can be manufactured at one-tenth the cost. The heating process also releases electricity used in the operation of the garbage destroyers, with a balance left for lighting the streets of one of the city's largest suburbs.

Hand Tailored Shapeliness

What makes one suit give you several seasons' wear and hold its shapeliness as long as you care to wear it while another suit loses its shape on the first damp day?

Because the shape of the first suit is made permanent by intricate hand tailoring, while the shape of the second is merely pressed in by the hot iron.

Fit-Reform Suits and Overcoats are hand tailored.
