Write for the Standard booklet, giving a full description of "The World's Greatest Separator," also folder entitled "Skimming Results."

For These Reasons

To tell all the reasons why we believe your choice of a cream separator should be the Standard would be impossible in this space, but here are four: **First:** Because the

Standard

cream separator under ordinary conditions skims to .01 per cent. or less. It loses but one-tenth of a pound of butter fat in 1,000 pounds of milk skimmed. The ordinary separator loses a full pound. **Second:** Because the Standard has a wide open bowl, and no cream or milk tubes to clog up. Everything easy to clean. **Third:** Because the supply can is more than a foot lower than on ordinary machines. No high or awkward lifting to do with the Standard. **Fourth:** Because the Standard has a self-oiling system and lubricates its working parts automatically all the time it is running.

The Standard will save more time and labor, and make more money for you, than any other cream separator. Try one and let the machine prove these facts.

Head Office and Works, Renfrew, Canada.

Agencies Everywhere in Canada.

16

The Spramotor Co. is the only Canadian firm in its line having an American branch, manufacturing in the United States, where they have been established for twelve years.

A Brass Spramotor costs little more than an iron machine.

With 16 years' experience in making Spramotors exclusively it would be a wonder if we did not make them better, as well as cheaper, than any other manufacturers who make sprayers as a side line. Our business life depends upon the success of the Spramotor. Our eggs are all in one basket, and you may be sure we watch that basket.

Having specialized on Spramotors, and having a larger trade than all others combined, we make them better and cheaper than others.

They are built to endure.

There are some Canadians who prefer American machines and buy them, while the Spramotor is being bought by the best people in the United States.
