#### GRAIN AND PRODUCE.

**WHEAT.**—Wheat has again experienced a strong upward movement this week. Yesterday at Chicago prices touched over 70c for July wheat, showing an advance altogether of about 17c since the upward movement started. While there was a good deal of talk about crop damage, the general advancing tendency of prices in staple lines is no doubt helping the strong move in wheat very materially. Beerbohm's and Bradstreet's reports as to the wheat crop outlook point to a probable reduction of 9 per cent this year, as compared with last in the world's crop, thus indicating the smallest world's total wheat crop since 1890. Exports of wheat from the United States, and from Montreal this week (flour counted as wheat) amounted to 2,397,000 against 2,305,000 bushels last week, 2,420,000 bushels in the corresponding week one year ago, 2,835,000 bushels two years ago, and 3,603,000 three years ago.

**WHEAT LOCALLY.**—It is hard to keep close track of the value of Manitoba wheat, sales being limited on account of light stocks and prices advancing rapidly. Every week lately we have advanced quotations, and this week there is a further sharp rise in values. The fact is there is very little wheat held for sale, and with the strong movement in the United States and a scarcity of wheat for milling in eastern Canada, holders of the little Manitoba wheat available hardly know what to ask for it. Wheat is much higher both here and in eastern Canada than in the United States owing to actual scarcity for milling. In fact, prices have advanced in Canada to a point which will almost permit bringing in wheat from the United States and paying the duty of 15c per bushel on it. A little wheat has already come in from the States for milling in Ontario. United States red winter wheat has sold in Ontario duty paid, at 88c, delivered at the mills. Ontario native
