

method of communicating intelligibly with patients of those nationalities and languages unfamiliar to the practitioner. The plan of the book is a systematic arrangement of questions upon the various branches of Practical Medicine, as the Eye, Ear, Nose, Throat, Fevers, Surgical Operations, Stomach Complaints, General Health, Special Diet, Patient's History, etc., etc., and each question is so worded that the only answer required of the patient is merely Yes, or No. The questions are all numbered, and a complete index renders them always available for quick reference. This little book has been written by one who, having had some hospital experience, and being frequently called upon to interpret for foreigners, presents it to physicians and students with the hope that it may facilitate their intercourse with the suffering. Bound in full Russia leather, for carrying in the pocket, (size, 5 x 2 $\frac{3}{4}$  inches). 206 pages. Price, \$1 net.

*Therapeutics: its Principles and Practice.* By H. C. Wood, M.D., LL.D., Professor of Materia Medica and Therapeutics, and Clinical Professor of Diseases of the Nervous System in the University of Pennsylvania. Seventh edition. Philadelphia: J. B. Lippincott Company.

We doubt if any work published on the subject of therapeutics has proved as popular on this continent as this. The present edition is the seventh published within a comparatively short time since the appearance of the first. We have for years had a very high opinion of Wood's "Therapeutics;" and we are pleased to notice in the present volume that the distinguished author is keeping fully up to the times. The vast number of new medicines introduced during the last few years are well described. One can scarcely realize the wonderful advances in this direction, and nowhere can he gain a better acquaintance with new remedies than in this work. Dr. Wood is neither purely theoretical nor visionary; on the contrary, he is eminently practical. We sometimes think that therapeutics does not receive all the attention it deserves. After all, its importance is second to none in the great and broad subject of medicine. We can recommend this book with great confidence, as being a safe

and reliable guide to the senior medical student and the general practitioner.

*The Applied Anatomy of the Nervous System.* BY AMBROSE L. RANNEY, M.D. D. Appleton & Co., New York. W. J. Gage & Co., Toronto.

Just at this time, when the surgical treatment of diseases of the brain is receiving so much attention, a work like that before us seems to be an absolute necessity. Not many years ago the discoveries of Ferrier were considered interesting alone to the student of pathology and physiology, but now they have a practical value; and no well informed practitioner can afford to be ignorant of the recent discovery made in the anatomy and physiology of that most important organ of the body, the brain. Thus the second edition has been, in part, re-written, and contains all the recent views of the leading workers in this department. "The aim of the author has been to furnish a reliable guide to the student of neurological anatomy and physiology, in which he may find the views of the leading minds in that field accessible, and the main facts which are applicable to diagnosis clearly interpreted." Any reader of the work before us will be convinced that the author has succeeded in fulfilling the aim thus given in the preface. The text is clear and concise, and the plates are numerous, and serve to illustrate this most difficult subject. We are confident that the work will be of great service to the student who wishes to obtain an accurate knowledge of the anatomy of the brain. It will be even of greater service to the practitioner who makes reference to it in cases of cerebral disease, especially when a tumor or abscess is suspected. We have great pleasure in recommending this work.

*The Case of Emperor Frederick III. Full Official Report by the German Physicians and by Sir Morell Mackenzie.* The German report translated by HENRY SCHWEIG, M.D., New York. This is the only edition giving the unabridged reports, with all of the illustrations, of Sir Morell Mackenzie and of the German physicians. Cloth, \$1.25. Paper, 75 cents. Address the Publisher, Edgar S. Werner, 48 University Place, New York. Be sure to order the Werner edition.
