Wood pulp is now being used as the basis of a plastic compound to serve as a substitute for lime mortar in covering and finishing walls. It is designed to possess in addition to all the desirable qualities of ordinary mortar, the characteristics of being harder, and, when applied to wood-work in a thin coat, rendering it both fire and water-proof.

The following is said to be a good application to prevent metals rusting. Melt one ounce of resin in a gill of linseed oil, and while hot mix it with two quarts of kerosene oil. This can be kept ready to apply at any time with a brush or rag to any tools or implements required to lay by for a time, preventing any rust, and saving much vexation when the tools are to be used again

TENDERS

Received for Nine Brick Stores (west end) up to to 12 o'clock noon, March 15th. The lowest or any tender not necessarily accepted. Plans, etc., may be seen at the office of
