Common during migrations. May breed as one was heard June 22nd, 1882.

78. Spizella montana: Tree Sparrow. Common during migrations. Remains in mild winters,

79. Spizolla domestica; Chipping Sparrow. Abundant everywhere.

- 80. Spizella pusilla; Field Sparrow. Rather local in its distribution, but common in its favorite localities. Breeds.
- 81. Juneo hyemalis; Black Snowbird. Breeds, but not commonly. Common in migrations and in mild winters a few remain.
- 82. Passer domesticus; English Sparrow. This little pest was introduced in London, Ont., about 1876, and is now abundant all through the city, and is found throughout the country for some distance: while almost all the towns and villages of Western Ontario have their quota.

83. Melospiza faciata; Song Sparrow. Breeds abundantly and in mild winters a few remain.

- 84. Melospiza palustris; Swamp Sparrow. Moderately common in swamps consisting of low trees and bushes. At the St. Clair Flats it is abundant.
- 85. Cardinalus Virginianus; Cardinal Grosbeak. Two taken at Chatham, May, 1849. (E. W. Sandys).
- 86. Passerella iliaen; Fox-colored Sparrow. Rare during migrations. Four or five specimens taken.
- 87. Pipilo crythrophthalmus; Chewink. Com-Breeds. mon.
- 88. Zamelodia ludoviciana: Rose-breasted | Grosbeak. Rather common. Breeds.
- 89. Passerina cyanea; Indigo Bird. Common. Breeds.
- 90. Dolichonyx oryzicorux; Bobolink. Breeds abundantly but always makes a well concealed nest that is rather difficult to find.
- 91. Molothrus ater; Cowbird. Very common. Have found eggs in nests of Plover, Tawny Thrush, Bobolink, Mendow Lark, Yellow Warbler, Chestnut-sided Warbler, Golden-crowned Thrush, Golden-winged Warbler, Cherry Bird, . Black Snowbird, Chipping Sparrow, Field Sparrow, Chewink, Song Sparrow, Red-eyed Virco, Warbling Virco, Indigo Bird.
- 92. Agelaius phoeniccus; Red-wing. Breeds abundantly in marshy places and near bodies of water; the majority of nests found being in bulrushes but often in bushes and once 8 feet from the ground in a thorn.
- 93. Sturnella magna; Meadow Lark. Common. Breeds. In fall collects in flocks and remains till about October 26.
- 94. Icterus spurius; Orchard Oriole. McIlwraith says, "I am only aware of one specimen being found in Canada." At present this is a common bird in Kent and Essex and is becoming | 114. Picus villosus; Hairy Woodpecker. Breeds

- more so in Middlesex, having been observed a number of times this year.
- 95. Icterus galbula; Baltimore Oriole. mon. Breeds.
- 96. Scolecophagus ferrugineus; Rusty Blackbird. Rather common in the migrations.
- 97. Quiscalus purpureus; Crow Blackbird. Common. Breeds. Often in communities in an old orchard.
- 98. Corcus corax carnicorus: Rayen. Occurs regularly at St. Clair Flats but is rare inland. except in the most unsettled districts.
- 99. Corrus frugicorus; Crow. Common. Breeds. Last year a flock of about five hundred was observed in June, generally much later.
- 100. Cuanocitta cristata; Blue Jay. Common. Resident throughout the year.

(Canada Jay not observed.)

- 101. Eremophila alpestris; Shore Lark. common in migrations, less so in summer when quite a number breed, and a still smaller number remain through the winter in small companies. Ruises two or three broods. Young birds have been seen following the parents April 25th.
- 102. Tyrannus Carolinensis; Kingbird. Common. Breeds.
- 103. Myarchus crinitus; Great-crested catcher. Less common than the last. Has a great fondness for snake skins in the nest.
- 104. Sayornis fuscus; Pewce. Common. Breeds. Its favorite resort for resting is on beams of old bridges; one nest, with remirs, being used for vears. Two broods are generally raised.
- 105. Contonus borealis: Olive-sided Fly-catcher. Not uncommon in the northern counties; not observed in the southern.
- 106. Contopus vireus; Wood Pewee. Common. Breeds
- 107. Empidonax Acadicas; Acadian Fly-catcher. Very rare, only one specimen taken : Hyde Park.
- 108. Empidonax pusillus Trailli; Traill's Flycatcher. Rare and usually wary.
- 109. Empidonax minimus; Lenst Fly-entcher. Generally common; quite scarce this year. Equally distributed through town and country.
- 110. Prochilus colubris; Ruby-throat. mon. Arrives early in May.
- 111. Chetura pelagia: Chimney Swallow. Common. Breeds. In the fourth week in May, thousands of these birds were observed circling around some chimneys on the Parliament buildings at Ottawa. In the woods they nest in hollow stubs.
- 112. Caprimulgus vociferus; Whip-poor-will. Rather common but local in distribution, prefering rough pieces of country.
- 113. Chordeiles popetue; Night hawk. common. Breeds.
