

• Carlos García Kuhn

: It has the concession in Punta Arenas and another one in Viña del Mar.

Also, there is a Microwave TV System which competes with TV Cable in Santiago and it is called TV Max.

Wave Multipoint TV:

This is closed circuit TV and it is a newly introduced service. Up till now in Chile, the only users are the Club Hípico and Hipódromo Chile which use it to transmit the horse races.

Data Transmissions:

Data transmissions use concessions of indefinite length and at present there are five participating companies; Entel Chile, Chilepac S.A., VTR, Telex Chile and CTC which just started with the service Data Red in 1991. It should be noted that Chilepac will participate in five different markets; Interurban Telephony (national and international), Television, Data Transmission, Fax and Telex. The maximum length of any concession is established by law. However, any company may request a concession of a duration as long as it wishes. Renewals are almost automatic when previously requested.
