

ARTICLE II

Scope

This Agreement establishes the terms and conditions governing cooperation between the Parties in the field of biological security (biosecurity) and biological safety (biosafety). Without limiting the foregoing, this cooperation may include, *inter alia*, the programming, design, construction, provision and installation of equipment, commissioning, certification and recertification of the Facility. This cooperation may also include the provision of Assistance to incorporate international standards and guidelines on biological security and biological safety into the national legislation of the Kyrgyz Party, interim biosecurity and biosafety enhancements at existing biological facilities, and training associated with each of the aforementioned activities as appropriate.

ARTICLE III

Modes of Cooperation

Cooperation under this Agreement may be effected through Implementing Arrangements or any other mechanism agreed to between the Parties.

ARTICLE IV

Funding

1. Assistance for any Cooperation Project carried out under this Agreement, including Cooperation Projects covered by Implementing Arrangements, shall be provided by the Canadian Party subject to the availability of funds from the Parliament of Canada.
2. Funding may be received by the Canadian Party from a third party for the implementation of a Cooperation Project undertaken pursuant to this Agreement.
3. The Kyrgyz Party shall provide a suitable, mutually agreed site for construction of the Facility, and may provide in-kind or other support for the realization of a Cooperation Project. The Kyrgyz Party shall ensure the proper operation of the Facility, and shall bear all costs associated with the operation and maintenance of the Facility following its commissioning.
