

transferring to Household Science in the second year should be charged the difference in fee (\$50.00) for the privilege of transferring. I pass this on for your consideration but it too appears to me a bit far fetched unless there is some precedent for such a procedure. Up to the moment I have been unable to think of any very feasible solution that does not seem also a rather arbitrary one.

Yours very sincerely,

*B. M. Philp*

HB

Head, School of Household Science.
