

That every Family should have a Case of Medicines

Needs no argument. Few families can afford to call the Doctor for every trifling ailment, or even to run to the Druggist so frequently. There always will be sickness, and with most families a good deal of it. To reduce it to the lowest, and slightest, should be the aim of all. With a Case of Humphreys' Specifics, and its Book of Directions, you are prepared for emergencies, and can not only relieve, but can prevent or cure nine-tenths of that which occurs. Your child is Teething, you relieve it; it has the Earache, Toothache, Headache, or Mumps, or Measles, you cure it; it wakes out of sleep at night with the Croup, you give it the needful Specific, and the storm is soon allayed. The child has taken cold, and Pneumonia is threatened, you give it the proper Specific, and the danger is averted. And so you meet every disease or ailment that occurs, and vanquish them before they have become formidable.

The result is, that the family all become more and more healthy. They have fewer diseases, better constitutions, are less liable to Consumption, Paralysis, Fever Sores, Hip Disease, Distorted Spine, Scrofula, Cancer, or other of those terrible diseases that destroy life, or render it a burden. Such diseases rarely occur, because the germs are destroyed by these Homeopathic Medicines, in early life. Thus health is preserved, and life prolonged.

With each case of Medicines there is a small Manual of Directions, describing the disease and giving proper directions for diet regime, and the proper administration of Medicine. DR. HUMPHREYS has also written another and larger book, his Homeopathic Mentor, full of information in regard to Life, Health, Disease, and methods of preserving and restoring Health. The reading or study of these books, can but qualify one to preserve their own health, and that of their household.
