

ular. On the line M F 2 cm. from M, mark M'. Connect M' B by a slight curve.

*Short Sleeves.*—The vertical A B equals  $\frac{1}{2}$  bust measure, plus 3 cm. The horizontal A C  $\frac{1}{10}$  of the same. On the line C A, 4 cm. from C, mark G. On the line B D, 4 cm. from B, mark E and on the line C D 4 cm. from D mark F. Trace a dotted line from F to G, the depth of curve to the right of this line is 1 cm. Join E A also by a dotted line having the same depth as the former, this curve should reach the vertical A B, 1 cm. 5 mil. from the angle. Connect E F by an oblique.

If desired longer, add to the right of rectangle a number of centimetres proportional to what is to be obtained in the length of sleeve. Nothing is changed to the left of the pattern.

#### TO CUT THE CHEMISE.

Take a piece of linen or cotton, whose length should be twice the total length of chemise, plus 10 cm. Fold the goods in two by putting the selvages together, then fold in the direction of the length in order that the shoulder may have no seam; for the front, place the line G B of the pattern on the fold, and the line I J even with the top. As the back is different from the front, slope it first taking one double of the goods, then slope the front. Cut the arm hole and sides; if the goods is not wide enough the pieces left after cutting the sides are made even and joined to the bottom selvage to selvage by whipping. Their seams will be a continuation of the side seam. The hem should be 4 cm. wide.

*Sleeve.*—Make A coincide with I so that the seam will be on the bias. Let E coincide with K of the arm-hole. The opening has a flap 15 cm. on the right side. The gathers on each side may be from 12 to 15 cm. while those in the back may be from 22 to 25 cm. These should be in proportion to the length of neck-band which is measured on that part of the shoulder which it is destined to reach. Cut the band 4 cm. wide, half of the band less 3 cm. is allowed for the back, and the rest for the front. The gathers should not be on the shoulders.
