

Sleeping Apartments and private Rooms are on the upper floors. On the north-east side of the Main Building is the Chapel of the Holy Family. The north wing is reserved for the use of the Sisters.

The Buildings are still in course of enlargement, two new sections having been completed during the past year, and devoted to the College Classes and the School of Music respectively. The College is well lighted throughout by electricity and heated by steam,—all wiring and piping being concealed between the walls. Fire-proof partitions and metal ceilings afford assurance of safety, while porcelain Drinking Fountains and Lavatories finished in marble and tile ensure sanitary precautions. The Class Rooms are large and airy, well ventilated by the indirect system, and bright with sunshine from early morning until well on in the afternoon. They are furnished with adjustable Harvard Desks in solid oak, and supplied with the newest and most convenient accessories, such as reversible windows, adjustable blinds, slate Blackboards, etcetera.

The Science Room is of special interest. It contains handsome Cabinets, working and demonstration Tables, and the complete equipment for all the experimental work involved in the College Courses. The perfection of this department is the result of visits to some of the leading Schools and Universities of Canada and the United States, and of much laborious correspondence on the part of the College Faculty; and neither trouble nor expense has been spared to make it perfect of its kind.

The Libraries are varied and extensive, including works by the best Authors upon every conceivable topic that could be of interest, or profit, to a student. The Botanical, Ornithological and Mineralogical collections are particularly interesting and complete. The Museum contains also some valuable Indian collections, representing the Stone Age, Concological and Numismatic Collections, cabinets of old China and Pottery, rare products of various Countries, and numerous other miscellaneous curios.

Twenty acres of the College Grounds are reserved for purposes of Games and other amusements. A fine double square of Lawn, facing the north-west entrance, is bordered by a nine-foot wide granolithic Pavement, which ensures comfortable pedestrian exercise, even in the most inclement weather. The Walks are lined with shade Trees and Seats. There are Tennis courts, Croquet lawns, Baseball and Basketball courts, and also a large open Field for miscellaneous athletic sports. Open air Rinks, Sleighing courses, and Toboggan slides afford healthful Winter exercise.

Great care is taken that the food supplied to the students is always of the best quality, wholesome and well prepared. The College Gardens and Orchards provide fresh vegetables and fruits in season, and a Dairy furnishes the best of milk and butter to the table.

The discipline of the College is founded on a due admixture of gentleness and firmness, the aim being to establish the most cordial relations between the Students and their Preceptors, that the latter may exercise over the former a truly maternal influence, and that the Students may feel disposed on all occasions, and with the greatest confidence, to appeal for help and advice to those who are entrusted with their guidance. Great attention is devoted to Physical Culture, Domestic Science, and the social department of the young ladies.

The Courses of Study provided by the College are as follows:

I. The Preparatory, embracing all the elementary and Entrance to High School Courses, and admitting to the Academic Grade.
