TORONTO'S LAST CHANCE TO SEE THE FAIR OF 1906

Yesterday's Crowd Was Biggest,
in Comparison, on Record—
Guests at Luncheon.

Review Day at the exhibition is a day of dreams. Into the two fantastic weeks of the fair are crowded the wealth and the wonders of the wide world. Toronto people will wake up in a day or two and find all the bright glories of the past fortnight faded into the most insubstantial pageant of life—the pages of old newspapers. To-day while there is yet time the tardy citizen may yet enliven his imagination and expand his vision by a glimpse at the magic of J. Orlando Gray's conjuring out of the vasty deep. We know transplanted human worth, or any other worth, will bloom to profit elsewhere next week, but to-day is still Toronto's, and there are memorable things to be seen. Gallant knights of six hundred years ago careening in blue armor for sake of distressed damsels, royal horses of to-day with clumsy prancing, contemporaries of Robin Hood in the bright gaily of Torontian Maydays, huge machinery moved by demons of fire and water, men from the utmost isles, music from Ultima Thule, treasures of the farm, loveliness of the garden, precious things from needle and loom, stores of mine and forest spoil, costly craftsmanship in all the arts and mysteries of labor, scintillating fires in heaven, moving multitudes thru light and darkness on earth, the grandeur of a nation and the simple pleasure of her children, pictures that last a lifetime, knowledge that wears forever, all are mingled there in the shifting kaleidoscope that must be shivered to fragments to-night.

Some misapprehension appears to exist as to whether "ranches" and the full fireworks program will be given this evening. As a matter of fact, the whole day's program, from 8 a.m. to 11 p.m. will be exactly the same to-day as on any other day. As regards the fireworks, arrangements have been made, but not only for an extra supply, but also for several new pieces, and the contractors promise the best display of any evening during the entire exhibition.

In Review.
Society and Review Day was marked by the greatest attendance ever registered for the last Friday. All day long the crowds, estimates at over 40,000, wandered about the grounds taking last looks at the band in the procession to get the best possible view before the grand stand the great destruction of prize-winning animals made one of the finest spectacles ever seen. The great cattle headed the line, followed by Angus and Galloways with the buffalo of Europe shagging their coats, Ayreshires sleek as silk, and Holsteins as shining glossy. Dairies and Jerseys, a herd for a Rosa Bonheur. Followed then the huge horses from England among them the four months orphan concealing its stolid grief in colish fashion; thoroughbreds, standard-breds, Hackneys, ponies and Clydesdales in striking contrast, heavy draughts, coach horses and riding mounts, racers and drivers, a comely array. And once again the variety show with its laughter and suspended breath.

Several presentations marked the imminence of the end yesterday. Dr. A. W. Bell, the new manager of the Western Canada Exposition, who has made himself a general favorite as live stock superintendent and assistant manager of the fair, was handed a bunch of money by Wm. McNeil, president of the Ontario Poultrymen's Association. H. B. Donovan of the Canadian Kennel Gazette watched the proceeding on behalf of the dog men. The gift amounted to \$450.

A similar amount was presented to C. B. McNaught, superintendent of industries. A token of regard and esteem which will be joined in by thousands was the gold watch presented to Lieut. Hall, conductor of the 2nd Life Guards Band. Under his leadership the music has been one of the very foremost features of the fair.

A Distinguished Trio.
Hon. Colin Campbell, Winnipeg; Hon. Greenwood, M.P., York, and Col. Belcher, mayor of Southampton were the speakers at the directors' luncheon at the fair yesterday. They were a typical trio of Canadians, representing successful Ontario men in the several spheres of municipal, provincial, national and imperial activity. It was refreshing to see the effect of the exhilarating draught of fame which has been raised to the lips of the Canadian member for the first time. Greenwood, an enthusiastic, all alive with buoyant, magnetic energy, the stimulus of cordial appreciation from his "own people" has shined every fibre of an enthusiastic and richly endowed temperament, and the result is an expression of honest delight, effervescing and pungent. Col. Belcher, who has said, had he been born in England would have emigrated to Canada. To his Canadianism, he adds, he owed his success in England. To Canada he ascribes all his welfare.

He had once been asked at a meeting in England who he was, and he replied that he was the political successor of Julius Caesar. (Laughter.) He would admit that no other member for York had made this discovery, of the fact remained that he represented the ancient city which 2000 years ago was the capital of the north-east of England.

British Medical Association and well received, for its members would take pains to describe to their countrymen the wonders of what he had taught in Whitby College in his institute to call "the brightest jewel in the imperial diadem." (Laughter.)

The East and the West.
Hon. Colin Campbell, attorney-general of Manitoba, is another successful Ontario man. He reminded W. K. George, who they had been in Winnipeg together in early boom days 25 years ago. He was born within 25 miles of Toronto in the fruit country, and remembered well when the grounds for the fair had first been acquired and he was pleased to note its prosperity. He came from the great west, where the people believed in themselves as much as the people of Toronto did—perhaps more so. He would like to say that they appeared the great debt of gratitude they owed to the east. There were some who said that westerners did not desire to recognize that debt. This was

not a fact. They were most willing to do so, for it was largely Ontario people and capital from Ontario which had made and developed the west. "We have done a great deal for ourselves, and Nature has done a great deal for us, but the confidence which Ontario people have displayed in us is the best underlying asset ever the west had," he declared. He deprecated the policy which tried to separate east and west. He had seen articles in some western papers, and in some eastern ones, too, which were intended to cultivate hostility between the east and the west. They should throw down any such attempts. Col. Belcher told how he had been agitating for electrical transit thru the country for the benefit of the

farmers, both for travel and for produce. He desired to tell the fair directors of one or two faults, as only their friends would do. He sympathized a good deal with the poor. He had seen thousands standing when they could not afford to pay for seats. It would be nice to provide them with seats so they could hear the music. Cheaper tickets might be provided for this purpose, also, he thought.

EXHIBITS WORTH SEEING.
Home Comfort.
There are over 5000 "Home Comfort" ranges in use, and there are as a consequence over 5000 homes that are happy.
And during this last year, the "Home Comfort" sales have increased 50 per-

cent—that means a 50 per cent. increase in happiness.
Perhaps the average person does not stop and consider at such length. But it's a fact.

If the cook stove is out of order, or never was in order, then the whole household is naturally out of sorts.

There is not a bit of use in blaming the cook or your wife.
If, after a hard day's work, the evening meal is a disappointment or on a chilly morning the breakfast is stone cold—don't chastise the cook or the food. Buy a "Home Comfort" range and smile with the 5000 users.

The results from a "Home Comfort" are vital and important to a very significant degree.
Your stomach will be in better condition, and your health will be improved. With these qualifications the brain will be keener and your faculties more subtle, and better fitted to deal with the daily business.

Best Material.
"Home Comfort" ranges are manufactured by the Wrought Iron Range Co. of Montreal, and the very appearance of a "Home Comfort" in a kitchen assures little trouble and no worry.

The exhibit of these stoves in the stove building will please the most fastidious.

Strangers to the merits of the "Home Comfort" will be cordially received, and explanations and demonstrations will be volunteered.

The stoves on exhibition are merely examples of the class that are sent out to every buyer. No favoritism is shown, and each section of each stove is made with the same identical precision and care. The best material that can be obtained is used in the manufacture of "Home Comfort" ranges.

The wrought iron and steel is tempered to the limit, and all defective pieces are spotted before the severe test process is completed.

No expense is spared.
The company realize that a good stove is a good advertisement, and hence they take no chances on a poor stove going out of the works.

The stoves are made in all sizes, and can be made to fit any nook and cranny.

From a baby stove for the back kitchen to the monsters used in the King Edward, are examples of what the Wrought Iron Range Co. manufacture.

Combined with good sturdy material that can stand any degree of heat, there is a style of finish that, if necessary, would warrant the "Home Comfort" being placed in the front parlor.

There is a plentiful supply of nickel plating used, that is easily cleaned and always looks bright and neat.

Every known convenience that can be applied to a stove has been used in connection with "Home Comfort" ranges.

Incomplete Without.
The modern and up-to-date household is incomplete without a "Home Comfort".

There is a glimmer of solid comfort about the stove that is pleasing and satisfying.

There is about them something that smacks of domestic comfort and for

The Bell Piano

Autonola

This wonderful instrument warrants your careful investigation. It is a magnificent piano with an exquisitely beautiful tone, and can be played by hand in the regular way.

It can also be played by any non-player with the aid of treadles and music-roll. This great boon to the music-lover who cannot play for himself is incalculable. Popular, classical, operatic, dance and vocal music are at the command of all. Anyone can play, and play ARTISTICALLY and WELL.

We will take your present instrument in part payment and can arrange monthly payments for the balance.

With each Autonola you get—without extra charge—fifteen rolls of music of your own selection, classical or popular. You can exchange any of these rolls at any time on payment of five cents for each roll, and you have a choice of OVER TWO THOUSAND selections from the Music Library at 146 Yonge St. It will pay you to examine this wonderful Autonola at any of the Bell agencies or at

Bell Piano Warerooms,

146 YONGE STREET.

Branch Warerooms of the Bell Piano & Organ Co., Limited, of Guelph, Ont., and London, England—"The largest makers under the British flag."

this reason thousands of frugal and provident housewives are naturally drawn towards them.
The reputation made by honest endeavor gives the "Home Comfort" a name that stands for utility and durability.
The sales at the exhibition this year give rise to optimistic conclusion, inasmuch that twice the number have been sold over that of last year.
This is excellent evidence of what the public think of them, and public opinion never goes far astray.
A word to the wise is sufficient. Before purchasing a range, visit the "Home Comfort" warerooms and be convinced that it is advantageous to yourself to buy none other.
A trial will result in unreamed of satisfaction, and the labor saved in cooking will add years to your life and smiles to the home.

Ideal Concrete.

Here are some of the salient points of merit of the Ideal Concrete Machine for making hollow concrete blocks. The Ideal Concrete Block Machine is all its name implies, "the standard of perfection."

Its four cardinal points are: Simplicity, durability, adaptability and rapidity. These four cardinal points covering an ideal machine have won for us over 1000 satisfied customers during 1906.

The machine is thoroughly interchangeable and will make any kind of block required for any building. An ideal machine produces quarter and half blocks, corner blocks, inner corner blocks, blocks for pilasters, porch piers, gables, door jambs, nailing plates, precast and foundations. The company has a greater variety of face plates and accessories than any other machine made and has spent large sums in investigations as to the practicability of placing an adjustable or interchangeable block machine on the market. An Ideal is always ready for business, no measuring, no loss of time, that's the trick which makes an Ideal a money-maker.

The Ideal is the original, face down block machine and is covered by basic patents both in the Dominion of Canada and the United States. Many imitations of this wonderful machine have sprung up on all sides which, while they are flattering to our product, yet all infringements of the machine will be daily prosecuted. We do not ship the machine on trial, because we have gone beyond the experimental stage.

The price is reasonable and we give everybody a square deal, and more ideal machines are sold than any other block machine on the continent.

The Ideal Company have an exhibit on the grounds, where demonstrations and explanations will be made to all those interested.

Dominion Honors.

The Dominion championship bicycle

CALOMEL RUINS THE SYSTEM.

It should only be used under a doctor's orders. For mild physic take Dr. Hamilton's Pills of Mandrake and Butterbur. No gripe or pain, but certain relief for headache, biliousness, constipation and torpid liver. Price, 25c.

Baldness and Sensitiveness

Usually go hand in hand. When a man loses his hair he dislikes to think about it, and doesn't relish hearing about it. His vanity is near the surface, and, after all, he cannot be blamed for resenting remarks about the appearance of his head. Since the advent of

Pember's Toupee

an effective means has been found to abolish baldness, preserve health, and improve the appearance of the hair. As light as thistledown, made from hair of the precise color of your own, thoroughly ventilated, and containing our Patented Natural Scalp Parting. A toupee from Pember's is a perfect reproduction of your original hair.

race will be run off to-day in front of the grand stand at 2.30.
The entry is large, so that the races will be run off in relays. The refereeing will be done by Louis Rubenstein of Montreal.

Cool Retreat.

Too much cannot be said about the I. C. R. exhibit in the natural history building.

It's just as popular now as it was on opening day—and a little more so. Yesterday was a "scorch" and to enter into the main room of the exhibit, with its sylvan fountain sparkling, was a decided relief.

The atmosphere was cooled and the magnificent view of hunting scenes rested the eyes after the glare of the hot sunlight.

The two stuffed bears proved to be an irresistible attraction for the children, who ask all manner of questions as to "who killed them" and "how did they get there?"

The grandest part of the Dominion seems to lie along the I. C. R. route thru the maritime provinces, where modern ideas and barbaric wilderness are so close together, and yet so far apart.

Mayor Interested.

Mayor Coatsworth visited the Ideal Concrete Machine Company's exhibit at the exhibition grounds yesterday, for the purpose of viewing the plans of artisans' houses shown by this company.

Mr. Frank Morley, secretary of the board of trade, accompanied Mayor Coatsworth on the visit, and both were favorably impressed with the ideas of the concrete company.

Mr. Thompson, commissioner of industries, was also an interested visitor to this exhibit. He enquired thoroly

into the plans of the ideal company for building workmen's houses.

Citizens' and Children's Day

8 a.m.—Gates open.
9 a.m. to noon—Industrial processes.
10.30 a.m.—Parade of horses.
Noon—Band of 2nd Life Guards.
1 p.m.—Directors entertain prominent citizens and educationists.
2 p.m. to 6 p.m.—Industrial processes.
2 p.m.—Selection by the Klite Band of Galt.
2.30 p.m.—Parade of His Majesty's and Lord Rothschild's horses on the grounds.
2 to 4.30 p.m.—Full grand stand performance.
2.30 p.m.—Champion bicycle races.
3 p.m.—Horse running races.
4 p.m.—Band of 2nd Life Guards.
The Ideal Company have a performance, with Cottrill and Powell's great equestrian act.
7 to 9 p.m.—Processes of industry.
7 p.m.—Concert by the Klite Band of Galt.
8.30 p.m.—Grand spectacle, "Ivanhoe."
9.15 p.m.—Fireworks.
11 p.m.—Skidoo.

THE AGE OF NIAGARA FALLS
Is doubtful, but one thing sure and certain is the instant effect of Putnam's Corn Extractor, which cures corns in one day. No pain, no ugly sore, but certain relief and cure in every case. Use only "Putnam's."

STEADILY ADVANCING

ONWARD—In Development.
UPWARD—In Value.

For months we have been recommending the purchase of

WHITE BEAR MINE SHARES

FOR DIVIDENDS AND SENSATIONAL PROFITS.

BUY NOW—TO HOLD—Not for a small profit, but for many times present figure, and a few months from now your hesitating friends will point to you as SUCH A LUCKY FELLOW—and will remember that you ALWAYS were LUCKY, etc., etc. Read, analyze and act—

**LE ROI—adjoining mine—sold one time 50 per share.
PRESENT MARKET PRICE, \$10.00 PER SHARE.**

There is the strongest possibility and probability that it will repeat the history of Le Roi—its next door neighbor.

WHITE BEAR—Present market price about 10c per share—the management state, with a few months' development will be on a dividend-paying basis. We consider the Company's last monthly report so satisfactory that we have had a number printed. Send for one and judge whether it is unreasonable to expect it to advance to **ONE DOLLAR PER SHARE**

Buy Canadian Gold Fields Syndicate.
