Wants Congress to Appropriate \$45,000,000 for Naval Aeronautica

Washington, July 11.—Congress is asked by Sec. Daniels to appropriate \$45,000,000 for naval aeronautics in addition to the amounts carried in this year's appropriation bill. The navy is working out a considerable air pro-gramme of its own, aside from the great \$625,000,000 military aircraft project of the defense council. "The value of aircraft has been abun-

dantly demonstrated in the present war," said Mr. Daniels, "and the navy is making efforts to build up an air force of sufficient size to operate as scouts from naval vessels, to patrol the waters off the extensive coasts of the United States and our insular posses-sions, and also to co-operate with naval forces abroad in anti-submarine war-

fare. "The \$45,000,000 recommended will be required to maintain and expand ex-isting schools and stations, to establish new stations and training schools and the purchase of necessary aircraft-sea-plance distributes and like halloonsplanes, dirigibles and like balloons-for use on the high seas and from coastal stations at home and in co-operation with our allies.

with our allies. "The additional personnel required for the operation of the naval aircraft is being enrolled in the naval reserve flying corps."
