## POLICE CHIEF SHOT; ACCUSES GOVERNOR

Revolver Duel in Havana Over Club Raid

### HEAVY GAMBLING FINES

Chief Riva Attacked by Governor Azbert and Senator Morales at Door of Former's Club and Shot in Head and Abdomen—Coachmen and Bystanders Also Get Bullets

Havana, July 8.—General Armando Riva, chief of the national police was shot and mortally wounded during a pistol fight last evening in the most crowded portion of the Prado. General Ernesto Azbert, governor of Havana province, Senator Vidal Morales and Representative Arias were involved in the fighting, which was the outcome of a raid made by Gen. Riva on Sunday night on the Asbert Club.

On that occasion a large number of members were caught gambling. They were arrested and sentenced to heavy fines. The governor complained to President Menocal who, it is understood, sustained the action of the police in enforcing the letter to the law.

Gen. Riva, while driving last evening with his two young sons, stopped his carriage in front of the Asbert Club and caused the arrest of the doorman by illegally carrying a revolver. Asbert and Morales arrived in an automobile about the same time and a heated dispute arose. Insults were exchanged and all alighted, advancing in a threatening manner. According to the stories told by witnesses, Asbert and Morales opened fire, General Riva falling with a bullet in his head and another in his abdomen.

Seeing their chief fall, several policemen ran to the rescue and opened fire, but Asbert and his friends re-entered their car and left at full speed.

Gen. Riva's coxswain was shot in three places and two by-standers received bullets. The Prado was crowded with promenaders, many of whom were women and children. General Riva was taken to a hospital, where he made a statement that he was shot by Governor Asbert. An operation was then performed but he was not expected to survive the night.

The tragedy caused the most intense excitement throughout the city. All political clubs were closed. Central Park and the Prado were patrolled by squads of police who prevented any assembling in groups. A strong force of rurales was held in reserve.

General Riva is an officer of the regular army. He was appointed chief of the national police by President Menocal and re-appointed by President Menocal.

### GERMAN WIRELESS A SUCCESS, SAYS AGENT

Engineer Mayer at Tuckerton, N. J. Tells of Messages in Daytime

### 850 FOOT TOWER GOING UP

Company Declared to Have Backers—New Features Described.

(New York Sun). Tuckerton, N. J., July 8.—Emil Mayer, chief engineer of the German company which is building an 850 foot wireless tower here, confirmed tonight the Sun's cable from London that wireless messages sent with Dr. Rudolf Goldschmidt's apparatus have been received from Germany.

The messages were sent from the company's 800 foot tower in Neustadt, near Hanover. They came in clear cut, three times a day, with hardly a missing word in the whole lot. They were sent at a slow rate.

Mr. Mayer will sail for Germany in a few days to arrange further experiments. These will consist in sending and receiving 200 words a minute.

The company back of this new transatlantic wireless believes it has mechanism that will enable it to send and receive twice as fast as the Marconi and Telefunken systems, both of which do business overseas. It expects to send at a rate as low as 8 cents a word. It promises a degree of secrecy and freedom from interference with messages hitherto impossible.

One of the remarkable features of the last few days is that the messages received here came in the daytime, the most difficult period for long distance wireless work. The many electric storms here in the past week made it inadvisable to test the tower at night, which is not in shape to send.

Dr. Goldschmidt's radiograms, all of which were short, were acknowledged by cable. They came in the form of greetings, and were in cipher. They were received by Mayer and two assistants.

The tower which received them is 650 feet high and when finished will be 850, the tallest in the world. It is being carried to so great a height solely to make possible the sending and receiving of messages not only between Europe and America but between America and Asia, South America and perhaps Sydney, Australia.

It is said that with three or four of these large masts the German company expects to belt the world. The German company is the Hoch Frequenz Maschinen Actiengesellschaft. Fuer Drahtlose Telegraphie, or the High Frequency Machine Company for Wireless Telegraphy.

It has German and French backers and English and American associates. The company has proceeded quietly, but this is said to be due to a desire not to announce itself until it is ready for business. That may be in a year, hardly sooner.

A New York representative is at 150 Nassau street. On the door of that office, it is said, only his name, Mr. Lemke, appears.

The \$2,000,000 stock of the original company is in private hands and the \$5,000,000 capital of a company soon to be formed in London is said to have

been subscribed fully. An American company will be formed to build the tower.

How confident the backers are is shown not only by the completion of the costly German tower and plant but by the way in which more than \$1,000,000 is being spent to erect a slender steel mast in the swampy land near Tuckerton. Marsh ground was picked because water is a first class conductor. Work began last fall and has been pushed ever since. The tower itself may be complete a month hence.

In a village in the New Jersey pine lands. The residents have been stirred for months by the mysterious mast going up in the swamp with steel beams and other material swelling the receipts of the Tuckerton railroad beyond all precedent. They say that the German company with the long name and longer purse was a god-send last winter. When farming and other work of the town was out of the question 180 men of the neighborhood were employed in the swamp at \$2.25 and \$2.50 a day.

**WHITE PLAGUE IN MILLS SPREADING**  
Dr. Perry in Report to U. S. Government Shows Ravages of Disease in New England.

"Tuberculosis is increasing among women and children working in the cotton mills of New England," says Dr. Arthur R. Perry of Boston, who has just made an exhaustive report on New England mills to the United States government. "I have undertaken to secure the most accurate information obtainable respecting the death hazard to females and children, incident to work in cotton mills, as compared with the corresponding hazard among individuals of like age engaged in other occupations," says Dr. Perry. "The study was carried out in Fall River, Mass., Manchester, N. H., and Pawtucket, R. I. These are the three largest cotton manufacturing cities in New England."

"Upon careful investigation I have found that tuberculosis is the most prevalent ultimate or immediate cause of death among those who work in cotton mills in these cities. "It has also been found that the Irish in each age, sex and occupation group, almost without exception, presented a higher death rate in these cities than any other race of people. "It seems hardly open, after this study, to doubt that operative work predisposes to tuberculosis and that its effect in this direction is greater among females than among males."
