

A new species of fillibustering has broken out in New York-a species more in keeping with the spirit of the age than that which Joaquin Miller has embalmed in gorgeous verse. The World says that several business men have just sent by the steamer Tybee the money for the purchase of Samana, San Domingo, they having been satisfied that the purchase which Congress rejected, would be a profitable one, and they have renewed the bargain with Baez. The purchase includes considerable more territory than the Bay of Samana. The purchasers of the territory will soon need protection, and General Grant will not refuse it to them, the result being that Samana Bay will become a naval depot for the United States, just corning the inefficacy of prayer. as the President long since planned that it should.
