

UNDERWOOD—a name which stands for the best in Typewriters.

The Underwood is the machine to be found in the best offices, where the greatest amount of work is done under the most exacting conditions.

The Underwood appeals to the discriminating user, because of its many time and labor-saving devices, its durability, its uniformly satisfactory work, and the absolute visibility of the writing.

And it is sold by a Canadian company, with offices in the large cities all over the Dominion. It is the only machine good enough for you if you want the best.
