

IS BUYING A HOME A PUZZLE?

You can still make the pieces fit!

With today's soaring inflation and rapidly rising interest rates the goal of owning a home or buying another home to accommodate your family's growing needs may appear to be impossible!

In the first quarter of 1980 there were approx. \$63,000,000 in sales within the Mississauga market. This figure represents almost \$10,000,000 of increased housing sales, over the same period of time in 1979, without a significant

increase in housing prices. This shows that more people are purchasing homes in today's Mississauga market.

Right now there are an abundance of properties available in Mississauga with existing financing at reasonable rates.

Let one of the Mississauga Real Estate Board's many knowledgeable realtors show you how to make the puzzle of buying a home fit together.
