

Teachers' Manuals

THE Teachers' Manuals published by The Western Extension College are intended to be used professionally during the day's work. Their practical value has been so thoroughly demonstrated during the past year that they are now an essential factor in the educational equipment of hundreds of Saskatchewan teachers.

Each manual has been built with constant and painstaking regard for pedagogy, for logical, step-by-step development of knowledge. They have been refined and shaped in the crucible of the schoolroom to ensure teachableness. The methods conform to the best professional practice.
