

WHEN YOU NEED anything in the line of BUTTER & CHEESE MAKING MACHINERY WRITE to the CREAMERY P'K'G. MFG. CO. LTD. COWANSVILLE, QUE.

What the Expert says of the U.S. Separator

"In my capacity as Dairy Expert I have examined and tested different makes of Separators, most of which have some good points. The Separator, however, which is the most practicable for the Dairy is the one that combines all the **Good Points**: It must skim clean and smooth, be simple of construction, have few parts, be strong and durable, and so made that anyone can run it.

"I find that the U.S. Separator fully answers these requirements. It skims much closer than any other machine I have examined. In construction, the U.S. is extremely simple and practical; the parts are few and interchangeable, and well and strongly made; it does not get cut of order, and may easily be run by the average boy. At State and County Fairs I meet a good many who use the U.S., and all speak very highly of it."

The report of Edw. Van Alstyne, Expert in charge of the Model Dairy at the Pan-American Exposition, shows the work done by the U.S. in the Dairy Test from Sept. 29th to Oct. 30th for 50 consecutive runs with the milk from 10 different herds:

Average fat left by nearest competitor, .0172
Average fat left by the U.S., - - .0138
Difference in favor of the U.S., - - .0034

This shows that the nearest competitor left 25 p.c. more butter fat in the skim milk—a waste which amounts to a large sum of money in a year.

**Everyone who has cows should have a
U.S. Separator and Increase His Profits.**

For Manitoba and the West we transfer our Separators from Chicago and Minneapolis, and for Eastern Provinces from Quebec, Sherbrooke, Montreal and Hamilton.

VERMONT FARM MACHINE CO., Bellows Falls, VT.
