THE FARMER'S ADVOCATE.

FIRST-QUALITY MACHINERY

Manufactured by

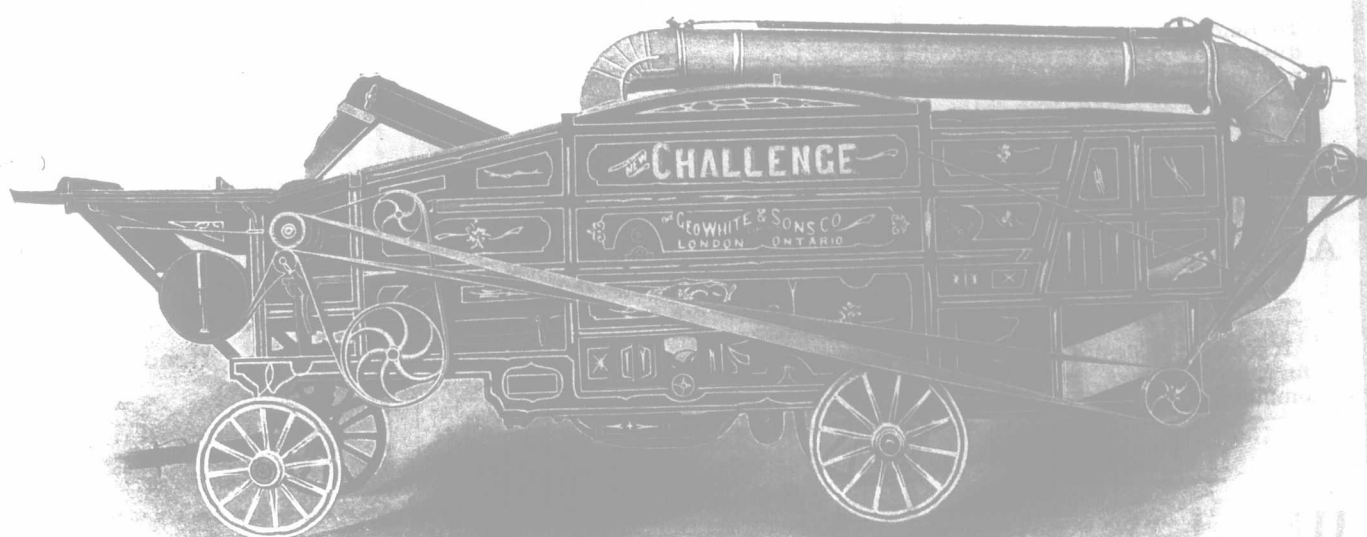

THE "WHITE" DOUBLE - SPEED FRICTION - CLUTCH TRACTION ENGINE.

THE
GEORGE WHITE & SONS
COMPANY, Limited,

London,
Ontario.

A FULL LINE

Traction Engines,
Portable Engines,
Threshing Machines,
Corn Huskers,
Sawmills,
Wind Stackers,
Self-feeders,
Chaff Blowers,
Dusters,
Barley Scourers,
Threshers' Supplies and
Sundries.

THE NEW "WHITE" CHALLENGE, WITH WIND STACKER.

THE "WHITE" CORN HUSKER AND SHREDDER, WITH WIND STACKER
AND SELF-FEEDER, READY FOR THE ROAD.

WHAT THE
**Corn Husker
and Shredder**
WILL DO :

It will shred the cornstalks, and make an amount of fodder equal in bulk and quality to ensilage from the same acreage.

It will husk the cobs of corn and put them in the crib—a nice profit.

A clean profit that without a corn husker and shredder is practically lost.

CONSIDER THIS !

It will, with its wind stacker, deposit the shredded corn stover in any part of the barn or storehouse desired, in a most compact, easy manner.

It shreds so finely that stock relish and thrive on the fodder to an extent that has never yet been obtainable when the corn is cut in the old-fashioned way and the sharp corners of the hard cornstalk injure the mouths of the stock.

To make money, be up-to-date.

The corn husker and shredder is the proper way to handle the corn crop.

We offer you a thoroughly-tested, Canadian-built machine, and a winner.
