

It's easy to grow plants in a Sunshine-heated home

Pure, Warm
Sunshine Air

It's the kind of air that makes plants thrive and is good to breathe into your own lungs.

If you want to guard your home (and who doesn't?) against evil-smelling, deadly coal gas order our agent to install the Sunshine furnace (guaranteed) in your cellar.

PEOPLE living in homes heated with ordinary furnaces often claim they cannot grow plants with any degree of success. This is due to the fact that ordinary furnaces are not provided with an Automatic Gas Damper. There is nothing to prevent coal-gas, which is deadly to plant life, being forced up through the registers.

Now, when the gas in the combustion chamber of the Sunshine reaches a certain pressure it sways open the Automatic Gas Damper and passes up the chimney, consequently there is no chance for it to escape through the registers. Instead, the air that passes through the registers is pure, warm, Sunshine air, laden with the proper degree of moisture from the water-pan.

A MAN WITH STRENGTH

A Man
of Courage!

No man should be weak, no man should suffer the loss of that vitality which renders life worth living. No man should allow himself to become less than nature intended; no man should suffer when there is at hand a certain cure for his weakness.

Most of the pairs, most of the weakness of the stomach, heart, brain and nerves from which men suffer are due to an early loss of Nature's reserve power. You need not suffer from this. You can be restored. The very element which you have lost you can get back, and you may be as happy as any man that lives.

A Man
Among Men!

You can feel as vigorous as you were before you lost your strength. You can enjoy life again. You can get up in the morning refreshed by sleep, and not more tired than when you go to bed. You can have no weakness in the back, or "come and go" pains, no indigestion or constipation. You can know that your strength is not slipping away. You can once more have bright eyes, healthy color in your cheeks and be confident that what others can do is not impossible to you. In short, do you want to be strong and healthy? We can make you all this, because we have done so for others.

If you have confidence in electricity, let me treat you at my risk. I will give you the Belt on trial, without one cent of risk to yourself. Give me reasonable security and I will take your case, and you

PAY WHEN CURED

My Dr. McLaughlin's Electric Belt will make you strong. It will send the life blood dancing through your veins, and you will feel the exhilarating spark warm your frame, the bright flash will come to your eye, and a firm grip to your hand, and you will be able to grasp your fellowman and feel what others are capable of doing is not impossible for you. This grand appliance has brought strength, ambition and happiness to thousands in the past year.

It is the one sure remedy for the cure of rheumatism, weak kidneys, weak stomach, lame back, nervousness, general debility and weakness in young and old, as well as dyspepsia, constipation, etc. How can you remain in doubt as to the value of this grand remedy when you see so many cures?

Dear Sir:—When I got your Belt, nineteen months ago, my stomach bothered me so that I could not sleep at night and my head hurt me so that I thought I would lose my mind; I thought I would sure go crazy, and my limbs would cramp so that I would have to get out of bed and rub them; so when I received your Belt I did not wear it more than three nights till I could lie down and sleep all night, so the money I paid for your Belt is cheerfully yours. If this will help you any you can use it, for I think that electricity is the proper way of curing all chronic diseases. Wishing you the best of success, I remain,
Your friend forever,

J. F. WORLEY, Gull Lake, Sask.

FREE TO YOU

Get my 80-page book describing my Electric Belt, with illustrations of fully developed men and women, showing how it is applied.

If you can't call, I'll send this book, prepaid, free, if you will enclose this coupon.

bers love nature and know that the study of it will effect the nature of the child. In three years school grounds could be so improved that the child would be only too glad to go to school every day in the year.

To improve the ground one should start at the beginning; break up the sod, work it down and sow a good lawn mixture. Windbreaks must be set out on the north and west sides, and a few rows on the south and east. A few small beds for flowers, also some flowering shrubs, specimen trees and the growing of trees here and there for shading and filling corners, and some vines over the porch and south windows are very desirable.

There are some obstacles in the way. The people in the country do not generally realize the conditions as they are, and so do not realize the need of improvement. There should be a general movement over the province. Members of the horticultural society know what the conditions are, how these can be bettered by the use of trees and flowers, and can do the work if they will.

GREAT APPLE SHOW

The magnitude and importance of the first Canadian National Apple Show to be held at Vancouver is indicated by the wide range of prizes offered. There are 11 carloads contests; 11 ten box; 19 five box; one three box, and 40 single box contests; two district; a limited two box, two barrel, two basket, two jar and two plate contest; three contests for big apples, five pack awards, 10 sweepstakes, besides carload, and 10 contests in homemade and manufactured apple by-products, etc., or a total of 115 contests, exclusive of plate display contests in which two prizes, amounting to \$5.00, are offered for each variety. There are about 2,000 distinct varieties of apples. More cash (\$20,000) will be paid to prize winners at this show than ever before offered at any national apple exposition. The medals which are of solid gold, solid silver and bronze cost from \$10 for bronze to \$150 for gold. In addition to cash, medals and diplomas awarded by the management of the show, there is offered in prizes, orchard land, nursery stock, spraying material, machinery, etc., amounting to several thousands of dollars in value.

In connection with the big show will be held on Wednesday, a pomological convention to be attended by the fruit growers throughout the Pacific Northwest for the purpose of formulating recommendations to the American Pomological Society, looking to a revision of the quality ratings of a number of the leading commercial varieties of winter apples which are grown to such perfection in this favored land. There will be district fruit growers' conventions and conferences throughout the exposition, thus giving every encouragement to the educational side of the fruit industry.

The judges of the show will be men of the highest standing, both as to character and ability to differentiate varieties and judge the quality of the fruit. The chief judge, Professor H. E. Van Deman, of Washington, D. C., is known throughout America as an expert pomologist. He has had charge of the judging of the horticultural exhibits of nearly all of the world's expositions held in America, and is an authority on the interpretation of the rules and regulations of the American Pomological Society, which has promulgated the only recognized standards. The associate judges are W. H. Bunting, St. Catharines, Ont.; Martin Burrell, M. P., Grand Forks, B. C.; Professor F. C. Sears, pomologist, Massachusetts Agricultural College; Professor Wilbur K. Newell, president state board of horticulture, Gaston, Ore., and Professor John Craig, secretary American Pomologist Society, Cornell University, Ithaca, N. Y.

The show is to be held in the horse show building, with seating galleries for 3,000 people. The show ring is 75 x 199 feet, so that there will be ample space for arrangement of exhibits. On a raised platform in the center the 48th Highlanders' military band, of Toronto, will be placed to give music for the visitors.
