

IN LONDON'S MARKET

Clondyke Excitement Unabated and Company Promoters Are Happy.

TUPPER - TURNER - POOLEY

All Three on Boards of New Yukon Floatations—Meetings of the Waverley Mines and Bank of British Columbia—B. C. Stocks Quoted.

LONDON OFFICE OF THE MINER. 105 Bishopsgate Street, Within, E. C. LONDON, July 31.—[Special Correspondence.]—Although the stock exchange is closed today (Saturday) and will not reopen until next Tuesday, the excitement over British Columbia in general and Clondyke in particular, continues, and this week has seen the flotation of two new companies formed to work in the Yukon. Details of one of these (the Yukon Gold Fields company) were forwarded you on Wednesday. Yesterday saw the introduction of the Clondyke Mining, Trading & Transport Corporation, with a capital of \$250,000, under the auspices of Messrs. Charles Tupper's company, while I hear today from a person that he hopes to be able to introduce his company next week. In addition to this I hear that Vivian Gray & Co. have got another company in hand, and the prospect is expected next week of a further concern which is now in process of formation with the object of conducting an exploring and financial business in the Clondyke.

Tupper is on the board of the Trading company mentioned above, and I learn from the other Exploration company, that the board will include the Hon. J. H. Turner and the Hon. C. E. Pooley. The excitement is unabated and it looks very much as if we are on the threshold of a boom in British Columbia, Yukon, Canada, etc.

The market in British Columbia shares is an fait accompli, and I enclose you a copy of the first list of prices issued by Messrs. C. & E. Paul, the chief dealers in the new market. This is merely a start and additions to the list have already been made, which will be included in the new forms. I saw Mr. Clement Paul yesterday evening and he was quite enthusiastic about the future of the section with which he is so closely identified.

Many new companies are on the tapis and the outlook for your province is brilliant in the extreme. The Waverley Mines meeting (statutory) was held yesterday. The proceedings were purely formal, but it was stated that the proposed contracts had been fixed up and it is expected that 1000 tons will be shipped and treated before the end of the year.

On the same day the ordinary general meeting of the Bank of British Columbia was held. Sir Robert Gillespie presided, and while making a rather adverse reference to the bank's business in the United States, was quite cheerful about the prospects of your province. His remarks were emphatically emphasized by Mr. W. B. Ward, who has just returned and was unanimously elected a director of the bank. The directors did not see their way to pay more than 4 per cent, although the chairman pointed out that the bank had been established 35 years and made \$1,230,000 profits and divided nearly \$1,000,000 among the shareholders. The chairman said the directors knew nothing about the rumored Canadian Bank amalgamation, to which I called your attention (on Halifax advice) a few weeks ago. Still some such development is said to be believed possible, if not probable, but it is at present quite premature.

The British Columbia Mining Review publishes a map of the Yukon gold fields in its issue today. The following are the shares quoted in the British Columbia section of the London stock exchange:

British Columbia "Devels." capital 30,000 £1 fully paid; London & British Columbia Goldfields, capital 200,000 £1 fully paid; British Columbia Financial Trust, capital 250,000 shares, 10s. paid; Vancouver & British Columbia General Exploration, capital 25,000 £1 fully paid; Galena Mines, capital 550,000 £1 fully paid; New Goldfields of British Columbia, capital 250,000 £1 fully paid; Dundas Gold, \$1,000,000 fully paid; Lilloet, Fraser River & Cariboo Goldfields, 300,000 £1.

MURDER AND SUICIDE.

Harry Swyny Fatally Wounds a Woman and Kills Himself.

NELSON, Aug. 12.—[Special.]—At 10:45 tonight Harry Swyny shot and fatally injured Alice Willis, the keeper of a house of ill repute, in this city. He then placed a revolver to his own head, killing himself instantly. The tragedy is supposed to have been caused by unrequited love, Swyny having for some time been paying attention to the woman. Alice Willis came to the city about four years ago from Port Townsend, Wash. Swyny was a cabinet-maker by trade, and has been here about three weeks. Part of the time and up to date he has been on a protracted spree.

SWYNY LIVED HERE.

While a Resident of Rossland He Was Dissipated.

H. V. Swyny, who shot and seriously wounded Alice Willis and then killed himself, at Nelson on Thursday, was well known in this city. About two months ago he came to Rossland from Butte, Mont., and soon afterwards hired rooms in the Imperial block. Swyny was an architect by profession and he formed a partnership with a Mr. Lohian, a builder, and the sign Swyny & Lohian adorned their office, which was in the upper part of the building. The partners sought to build up business, but were not successful, owing principally perhaps to the fact that Swyny was intoxicated most of the time and was therefore unfit to attend to business. Swyny was a native of Scotland and early in his career he enlisted in the Scotch fusilier guards, and after serving for eight years, he left the service in 1880. He was a married man and has a family in Eastern Canada.

Swyny and Lohian dissolved partnership after they had been together two weeks. About six weeks since Swyny bought a through ticket for Vancouver. The supposition is that he went to Van-

CONVERT AND FINDING BUSINESS DULL THERE WENT TO NELSON.

The Willis woman, whom he shot, went to Nelson from Port Townsend four years since. She is very wealthy and one of the best of her class. She is widely known and attractive, being tall, slender, with gray eyes and brown hair. Swyny was undoubtedly suffering from delirium tremens when he shot the woman and killed himself.

FURTHER DETAILS OF THE TRAGEDY.

NELSON, Aug. 13.—Following are the additional particulars of last night's tragedy. Last night Swyny went to Alice Willis' house. He persisted in hanging around, and the woman ordered him out. Swyny went in the dining room, and sent for the women. She remarked to the inmates, "I am afraid to go near him." There was no light in the dining room, and when she went near him, he put the pistol close to her and fired, the bullet entering the stomach. Her clothing caught fire. As she ran, he fired two more shots without effect, the bullets entering the ceiling. Then he turned the weapon against himself, the bullet entering the centre of the forehead. He was breathing his last when the inmates reached the room. The Willis woman was taken to Drs. Labau and Forin. The bullet was probed for this morning. It entered the left side of the abdomen, and was taken out of the back. Her chances of recovery today are said to be fair.

BOND ON THE ALPINE.

Second Payment of \$10,000 Made—Slocan City Notes and Brevities.

SLOCAN CITY, Aug. 11.—[Special.]—The D. W. McGregor, trustee for the Lemon creek townsite, says that within a month there will be a good trail up Lemon creek from Slocan river to the new townsite. Mr. Bascom has decided on a site for the saw mill, and before very long the hum of the mill will break the silence of Lemon creek.

Mr. McGregor has been looking over the Black Prince group with a view of bonding it for a Chicago syndicate. It will be remembered a short time ago J. D. Wallace visited Slocan City and during his stay much of his time was spent with Mr. McGregor discussing various propositions. Mr. Wallace represented the syndicate. An expert from Chicago will be sent here to make a thorough inspection of the Black Prince group shortly. If the bond goes through there is no fear the syndicate being disappointed with their property.

The second payment of \$10,000 was made on the Alpine group, situated on Lemon creek a day or two ago. This property was bonded some time ago for \$60,000, although at the time of bonding a very small payment was made. The property was owned by Slocan City boys, Heckman Bros. and J. McKinnon. It is very encouraging to the people of Slocan City to see the payment met in such a punctual manner. It is needless to say it is looking well.

The Crown Point claim, situated on the main Lemmon, is a scene of activity. Men are stripping the ledge and extensive preparations are being made to open up the property thoroughly.

The Lucky George, on Lemon creek, has very high grade ore and there is plenty of it there.

There has been a great deal of talk lately about the Cameronian. It is situated on the second north fork of Lemon creek, about a mile and a half up. It is owned by an incorporated company. The shares sold readily at 15 cents each. It will be good news to the holders of stock to know the Cameronian has 100 tons of pay ore on the dump. The trail up Lemon creek will be the means of the Cameronian shipping its ore.

A general meeting of the Slocan City Civic committee was held in the Odd Fellows hall on Monday evening. The principal objects of the meeting were to pass the bylaws governing the organization, and discussing the means of building the wagon road up Springer creek.

The election of school trustees under the Public School act for the school district of Slocan City and Brandon, was hotly contested, the rivalry between the two towns making itself strongly felt. The nominees were representatives of the two towns, and Messrs. Bradshaw, O'Neil and Robertson, all Slocan City residents, headed the poll in the order named by good majorities.

FORMED A NEW COURT.

It Was Instituted at Northport by J. H. Falconer.

NORTHPORT, Aug. 13.—[Special.]—A new court of the I. O. F. was instituted on Wednesday evening here by J. H. Falconer, deputy supreme ranger. The occasion was a most enjoyable one. There were first the initiatory services, then there was a banquet, an election of officers and finally the initiation. Following are the officers who were elected and installed: Judge J. C. Harness, court deputy supreme chief ranger; J. D. Working, chief ranger; P. Devine, past chief ranger; W. S. Rose, vice chief ranger; Dr. J. F. Harris, physician; Homer Working, recording secretary; John Granquist, chaplain; E. N. Erdman, superintendent juvenile court; Guy Huginin, financial secretary; W. D. Connor, treasurer; C. E. Skelton, senior woodward; Frank D. Berners, junior woodward; W. B. Olson, senior beadle; E. F. Oberholzer, junior beadle; Sam Wighton, Henry Broderius, trustees. Mr. Falconer was presented with an address congratulatory of his grand work for the I. O. F., and it was resolved that copies be sent to Dr. Oronhyatekha, supreme chief ranger, and John McGilivray, Q. C., supreme secretary, Foresters' temple, Toronto.

PROGRESS OF WORK ON THE ROYAL GOLD.

John Scrafford, who has charge of the work on the Royal Gold property, reports that work is going on in a very satisfactory manner. The ore body is not increasing in size, but at the same time the quality taken out is good. Great results are looked for as depth is gained on the ground. The distance from the Royal Gold company's property to the proposed smelter at Northport is not more than from 6 1/2 to 7 miles. The Royal Gold company intends to soon do some work on the Pioneer group, which joins the boundary line, and also on the Empire group on Grouse mountain.

PILES CURED IN 3 TO 6 NIGHTS.

Dr. Agnew's Ointment will cure all cases of itching piles in from three to six nights. One application brings comfort. For blind and bleeding piles it is peerless. Also cures Tetter, Salt Rheum, Eczema, Barber's Itch, and all eruptions of the skin. 35 cents. Sold by McLean & Morrow.

VOICES IN VICTORIA

They Protest Against the Dominion's Clondyke Policy.

WANT NO RESERVE CLAIMS

They Say It Will Make All Sorts of Trouble—The Government Also Requested to Suspend the Royalty Classes For a Time, At Least.

VICTORIA, Aug. 13.—At a public meeting, held tonight to discuss the Yukon regulations, Mayor Redfern presiding, the following resolutions were passed:

"That in the opinion of this meeting the regulations of May 21, 1897, for the control of the gold mining in the Yukon district of the Northwest Territories, which reserves to the government of Canada every alternate claim, is highly objectionable and ought to be annulled because:—

First—It will prevent miners from operating together, as is the custom in placer mining, and from working their individual claims to the best advantage.

Second—It will lead to grave questions as to priority of discovery, out of which very troublesome and expensive disputes and in remote localities even bloodshed will undoubtedly result.

Third—The authority vested by the regulations in the minister of the interior to determine how the reserved claims shall be disposed of, renders uncertain what is in the interests of miners ought to be fixed definitely, as it is likely to be of extreme importance to the owner of a claim to know upon what terms he can obtain the adjoining reserved claim.

Fourth—The arbitrary power vested in the gold commissioner to decide what constitutes a trespass on a reserved claim, and impose the penalty therefor, is liable to be greatly abused and is certain to work grave injustice in some cases, unless a speedy method of appeal from such decision is provided for.

Fifth—Any regulations which like this are certain to create great friction between the miners themselves, as well as between the miners and the government officials, are ill-advised, especially when they apply to a distant district like the Yukon, the policing of which will, under the most favorable circumstances, be a matter of great difficulty.

Further resolved, that this meeting while appreciating the desire of the government to make the Yukon gold fields revenue providing, believe that the conditions proposed in the way of fees and royalty are excessive, grievously burdensome and calculated to defeat the object for which they are imposed. Also that this meeting recommends the Dominion government to suspend the regulations as to reserved claims and royalty, until some of the ministers have had an opportunity to visit the coast and personally acquaint themselves with the conditions existing in a mining community, after which the whole subject of fees, royalty, the taxes on miners and the most popular regulations, be a matter of great difficulty.

Resolved, that this meeting while appreciating the desire of the government to make the Yukon gold fields revenue providing, believe that the conditions proposed in the way of fees and royalty are excessive, grievously burdensome and calculated to defeat the object for which they are imposed. Also that this meeting recommends the Dominion government to suspend the regulations as to reserved claims and royalty, until some of the ministers have had an opportunity to visit the coast and personally acquaint themselves with the conditions existing in a mining community, after which the whole subject of fees, royalty, the taxes on miners and the most popular regulations, be a matter of great difficulty.

BRUCE MINE IN LUCK.

Vein Once More Shows a Body of High Grade Ore.

TRAIL, Aug. 12.—[Special.]—The hand-somest free milling ore yet seen in Trail was exhibited today from the Bruce mine, formerly the Norway, on Lookout mountain. The property is owned by the Bruce Gold Mining company, of which Goodeve and Patterson, of Rossland, and F. Hagan, of Trail, are about the largest stockholders. The specimens brought down today are from the face of the ledge and are rich in gold, which is visible to the naked eye. The Rossland gentlemen interested in the property have been notified of the strike, and are expected down tomorrow to see the work already done.

The tunnel now 135 feet, but for the last 20 feet the men have not been in ore at all. Blast after blast has indicated the rapidity with which the work has been pushed during the past few weeks, and the lead just struck is the result of their efforts. It is about 500 feet above are two more leads into which a few shots were put, showing free gold in great quantities. Every piece of quartz on the dump shows the yellow metal in sufficient quantities to assure the owners that they have an excellent property. The men now at work have stopped drifting and have commenced to crosscut to the footwall, when they expect to find even a larger deposit of free milling ore.

Rossland parties are largely interested in many of the claims on Lookout mountain and today's strike simply indicates that the properties on which they have expended money will bring satisfactory returns with proper development. The Sovereign, Debe, Oriental, Red Point, Emma, Charles and Wolverine have all shown excellent samples of ore, but none of them have given as much promise as the Bruce. It is located about half a mile from town.

ORE FROM THE SKAGALEE.

Bauer & Parker have some rich looking rock in the window of their office.

It is from the Skagalee, on Sullivan creek, nine miles north of Rossland. The vein is 100 feet wide, and a shaft 528 feet has been sunk for a distance of 10 feet on the vein. Several ounces of rock taken from the shaft is strongly mineralized. The vein in this mine is supposed to be a continuation of the Heather Bell ledge, which is five claims away to the east. It is expected that a great deal of ore will be developed into a great mine.

MAP OF CLONDYKE.

THE MINER received by Friday night's mail the best map of the Clondyke we have yet seen. It is on a large scale and shows the various routes from the coast into the mines. It is issued by the Province of Victoria, and is the best of many respects of the splendid series of mining maps that enterprising journal is issuing. It is on exhibition in the window of THE MINER office.

PROSPECTUS OF THE Cumberland Gold Mining Company

Limited Liability. Incorporated Under the Laws of British Columbia.

CAPITAL STOCK, 2,000,000 Shares; Par Value, \$1.00 Each, Fully Paid, Non-Assessable. TREASURY STOCK, 500,000 Shares; Par Value, \$1.00 Each, Fully Paid, Non-Assessable.

HEAD OFFICE, ROSSLAND, B. C. MINES, WILD HORSE CREEK.

FRANK H. YOUNG, Merchant, President. J. H. McDONALD, Miner, Vice-President.

J. T. MCKENZIE, M. D., Secretary-Treasurer.

TRUSTEES: FRANK H. YOUNG, Merchant, Rossland; A. C. SINCLAIR, M. D., Rossland; J. H. McDONALD, Miner, Rossland; A. B. ACOORN, Broker, Rossland; J. T. MCKENZIE, M. D., Vancouver; G. W. WILLARD, Miner, Rossland; J. D. BREEZE, Insurance Agent, Vancouver; J. M. EDGREN, Miner, Rossland.

BANKERS: BANK OF BRITISH NORTH AMERICA. SOLICITORS: ELLIOTT & WHITESIDE. OFFICIAL BROKER: RICHARD PLEWMAN, ROSSLAND.

The company is the owner of the "Boston," "Cumberland," "White Rose," "Hidden Treasure" and "Copper Cape" mineral claims.

The title is perfect, there being no charges or incumbrances of any sort recorded against the property.

The following is the Engineer's report on the property:

ROSSLAND, B. C., December 2, 1896.

MR. FRANK H. YOUNG, Rossland. As requested, I have visited the Cumberland group of claims:

They are situated on the North Fork of Wild Horse Creek, a tributary of Salmon river, in Nelson division of West Kootenay mining district, B. C., ten miles south of Nelson, and nine miles south-east of the Silver King mine, and one mile north of the Elise.

This group of claims is about six miles from the Nelson & Fort Sheppard Railway, from which it is reached by an easy trail.

A wagon road with an even grade could be built from this group to the Elise, at a cost of about \$1,000.00.

The property consists of five full claims; each is 1,500 x 1,500 feet.

Cumberland and White Rose, on the west side of Wild Horse Creek; Boston, Hidden Treasure and Copper Cape, on the east side of the creek. These three claims show good, strong veins; but no work has been done. The veins all have a northeast and southwest trend or strike.

The White Rose vein has been exposed for some distance, and shows a ledge about four feet wide. The country rock is a slaty schist, standing nearly vertical, the planes of stratification being north and south.

The vein matter is composed of quartz and iron sulphides, carrying gold and silver.

The Cumberland vein has been exposed by an open cut of some eight feet, and a shaft five feet in depth, and shows the vein to be about three feet wide.

The vein matter in this ledge is quartz and iron sulphides, the sulphides at surface having been oxidized to some extent.

The strike of the Cumberland is northeast and southwest, and dips to the northwest.

The country rock is a slaty schist and stands almost vertical, the planes of stratification being north and south. This has every appearance of being a true vein, and no fear need be entertained of its giving out.

This group of claims is favorably located, being only six miles from the Nelson & Fort Sheppard railway.

By this and connecting railroads, all smelters can be easily reached. The Nelson smelter is nearest; but the Pilot Bay and Trail smelters, as well as those in the United States, are easily reached.

There is an abundance of timber standing on the claims, sufficient for mining and building purposes for some time of come.

A never-failing supply of water can be obtained from the creek which runs across the group of claims.

I would advise that a shaft be sunk to a depth of one hundred feet on the ore chute now exposed, and the manner of prosecuting future development be decided upon when the strike and dip of ore chute be more definitely determined from such work.

I regard the surface indications as favorable for the development of profitable ore bodies with depth.

HENRY KEHOE, Mining Engineer.

Since the foregoing report was made by Mr. Kehoe, considerable development work has been done upon these claims under his able supervision. A shaft 25 feet deep has been sunk upon the Cumberland, from which assays have been made running \$16.00, \$18.00, and the highest \$20.00 in gold and 67 ounces in silver.

On the Hidden Treasure another shaft has been sunk to a depth of nearly 25 feet, and from it \$11.00 and \$14.00 assays in gold were taken. Four men are now engaged upon the property, and the cost of all development work to present moment has been borne by the promoters.

The trustees, through the company's official broker, now place upon the market 100,000 of the Treasury Shares for sale at 5 cents per share.

The by-laws of the company provide that no debt shall be contracted by the directors unless the money is actually in hand at the time of contracting such debt to meet the same when due.

Address all communications to the Official Broker:

RICHARD PLEWMAN, 9 Imperial Block, Rossland, B. C.

THE NORTHERN PRINCE.

Last Strike on O. K. Mountain Described.

The following description of the Northern Prince on O. K. mountain, the scene of the latest strike, was furnished THE MINER by a disinterested mining man, who visited the property Thursday:

The Northern Prince mineral claim lies on the east slope of O. K. mountain, it adjoins the St. Bernard claim on the south and the Rubenstein on the north.

There are indications of two parallel veins on the property, but as yet but one vein has been definitely located. This vein has an average width of eight feet and has been exposed on the surface for a distance of 800 feet in length. The trend is nearly due north and south and the dip to the east at an angle of about 20 degrees from the perpendicular.

The development consists of a drift on the vein about 40 feet in length. The face of the drift is about 25 feet under the apex of the vein. The walls are perfectly defined with a good talc separation on both sides. The vein matter in this drift is well mineralized and the highest value obtained here is \$24 in gold and copper.

A crosscut tunnel has been run about 80 feet below this point and at a distance of 36 feet cut the vein, which has been crosscut showing good clean walls, with well mineralized vein matter for the entire width. There is an ore chute 18 inches wide that assays \$36 in gold, and will doubtless run high in copper. The ore is much decomposed fine quartz.

A drift is being run to the south and another will shortly be run to the north. Present indications are that the ore chute will widen rapidly in the north drift. The vein matter contains a coarse black sand as is found in placer gravel.

SALT LAKE INTERESTED.

George P. Holman Says Utah Will Take Hold of B. C.

George P. Holman, of Salt Lake, and his son-in-law, T. W. B. London, of Portland, arrived Thursday from Ainsworth camp, on Kootenay lake. They have the Big Four claims on Woodbury creek near by. The latter is a gold property. They have also been on the North Fork of Kettle river, where they have some properties.

Mr. Holman is engaged in mining in Utah, being president of the Swanes Mining company, and now expects to come into British Columbia. He likes this country and says much Salt Lake capital will find its way here.

SNEAK THIEF'S ADROIT WORK.

Mr. Helen Varker, of the St. Lawrence hotel, is out a little over \$50.

A day or two since a lady called to look at some rooms for housekeeping which were for rent in the basement of the hotel. Mrs. Varker put her purse containing the \$50, in a glove, which she laid on the reception room table and went down stairs to show the table and the applicant for them. Mrs. Varker had only been down stairs a few minutes when she began to get uneasy about her purse, for the reason that the door opening on the street was open. She excused herself to her caller and hurried up

ROCK THAT RUNS HIGH.

It Came From the Minerva Group On Crawford Creek.

In the window of the office of H. B. Dunlop yesterday was some pretty, heavily mineralized ore, and all the afternoon it attracted much attention. On inquiry it was learned that it came from the Minerva group, which is owned by the Pilot Bay Mining and Development company. The property is located on Crawford creek, 20 miles from Pilot Bay, and it is expected that the crew's Nest Pass assay will be built within a mile and a half of it. The highest assays from the property give \$50 in gold, 422 ounces in silver and 22 per cent copper. The smallest assay was \$240 for all values. Experts say that it is as fine a looking lot of rock as has come into the camp for a good many days.

ASSAYS OF DUNDÉE ORE.

W. S. Weeks informed THE MINER Friday that three assays just received from the Dundee mine at Ymir ran \$38, \$38 and \$45 respectively. In the last assay \$40 of the value was in gold. The samples were taken from the bottom of the shaft, now 125 feet down.

A BROKEN-DOWN LUMBERMAN.

Not a Financial, But Worse, a Physical Weak—Past Doctors' Skill, But Cured by an American Nervine.

Prostrated by nervous debility, Mr. E. Errett, lumber merchant and mill owner of Merrickville, Ont., was forced to withdraw from the activities of business. He says: "I tried everything in the way of doctors' skill and proprietary medicines, but nothing helped me. I was influenced to use South American Nervine, and I can truthfully say that I had not taken half a bottle before I found beneficial effects. As a result of several bottles I find myself today strong and healthy, and ready for any amount of business, where before my nervous system was so undermined that I could scarcely sign my own name with a pen or pencil. I say, feelingly and knowingly, get a bottle of this wonderful medicine."

Sold by McLean & Morrow.

DEATH FROM SUFFOCATION.

Almost a Fatality But for Dr. Agnew's Cure for the Heart—Strange Story of a Northwest Lady.

A death to be dreaded is that from suffocation, and yet this is one of the usual phases of heart disease. Mrs. J. L. Hillier, of Whitewood, N. W. T., came as near this dangerous point as need be. She says: "I was much afflicted with heart failure, in fact I could not sleep or lie down for fear of suffocation. I tried all the doctors in this section of the country, but they failed to give me relief. A local druggist recommended Dr. Agnew's Cure for the Heart. I tried it, and with the result that I immediately secured ease that I did not know before, and after taking further doses of the medicine the trouble altogether left me. It is not too much to say that it saved my life."
