

MINES AND MINING

Mr Burnet on Geology of Burnt Basin District.

WHAT IS NOW BEING DONE THERE

Properties Which Could Not Fall to Please Mining Men - A Strike Made in a Boundary Property - Work on the Iron Mask.

Kenneth L. Burnet, who has lately paid an extended visit to Burnt Basin, interviewed Thursday by a representative of the Miner, was very explicit in his praise of what he had seen in this region.

The auriferous part of the district is, as far as yet known, confined between two huge porphyritic dykes, about half a mile apart, which are running parallel with each other, cross the north and south basins, running in a north north-easterly and south south-westerly direction for a distance north and south, which at present is not accurately known, and is not marked upon any geological survey. Between these huge dykes, whose course can easily be traced by even a casual observer, lie the metalliciferous veins of this district. These run parallel with the dykes, their dip being nearly vertical, but with a slight inclination to the east. To the southern half of this basin a good government trail has been built from Gladstone, about two and a half miles away. Here there are very many claims staked out, and there is hardly one which, lying between the great porphyritic dykes, has not at least a good showing. In fact, Mr. Bennett declares the surface showings in this district would more than compare favorably with those of any other that he had seen in the Kootenays.

There are prospect holes everywhere over the ground, six or eight feet deep, each with a little pile of ore, good ore, lying beside it. The metalliciferous veins are of galena, free milling quartz and base gold copper. The Mother Lode, on the main lead, has two veins, one of free milling quartz and the other base gold copper ore. This particular property has had a great deal of work done upon it and has therefore a particularly good showing. Adjoining this property is the Tammany group, which has wonderful surface indications. Mr. Bennett said he saw outcrops of such wonderful richness that it almost pays a prospector to pack them on his back down the 25 miles of trail into Rossland. Not much work has as yet been done upon this group, which lies southerly of the Mother Lode. Next comes Luke Sharck's Unexpected and C. S. Wallis' Mecklenburg, on which, quite recently a vein was uncovered containing native silver, free milling quartz and native copper, which is a very uncommon combination to be found upon the same lead. Ore is exposed on many of the claims south of the Mecklenburg, among which are the Tunnel, Aldine, Kitty and Cooper's Solid Gold group, on which latter there is shipping ore in several places. Also the Mystery, Ennismore, with an exceptionally fine outcrop, and Dr. McKenzie's Hastings. Any one of these claims, Mr. Burnett states, is fully worth a mining man's time to go and examine carefully.

North of these groups is opening up what is known as the northern basin, in which the prospectors are finding equally good results. Mr. Burnett is going out next week with the intention of running survey lines and mapping out the whole of this interesting section, which at present has nearly a hundred claims located upon it.

The only route at present is by rail to Gladstone via Trail and Robson, the fare being \$3. Twenty-five miles of government trail from Rossland will carry the prospector and his pack horses there comfortably in one day.

A Strike on the Butcher Boy.

A big strike has been made on the Butcher Boy mine, in Deadwood camp, says the Greenwood Miner. John Mack, the general manager of the Butcher Boy Gold and Copper Mining Company, returned to the city today from the mine, and told a Times representative that the whole face of the drift at the 100-foot level is in solid ore. Mr. Mack brought samples down with him to have assayed. The ore is typical Deadwood camp ore that cannot be distinguished from that of the Mother Lode, near which property the Butcher Boy is situated. There is a 100-foot shaft on the property and from the bottom of the shaft a drift has been run 30 feet west before the ore body was encountered. This drift will be continued to cut through the ore vein. The showing at the Butcher Boy is so encouraging that arrangements are being made for the purchase of a hoist and pump of sufficient capacity to develop the property to the 1,000-foot level.

The Iron Mask Shafts.

Work is being pushed on the Iron Mask. Depth is being gained as rapidly as possible and the west shaft has reached a depth of 300 feet and the east shaft of 275 feet.

The Mountain Trail.

Work has progressed steadily on the Mountain Trail owned by the Philadelphia Mining Co. throughout the winter and during the past season some very fine ore was run into. Some of the leading members of the directorate are shortly to visit Rossland and the company's property, and will make arrangements for developing it on a systematic basis. Situated near the boundary line within a mile of the Red Mountain track, on a well wooded and watered slope, there will be found, it is stated, no difficulty experienced in placing this property in first class order.

WORK ON THE WINNIPEG.

Pumping Was Started Yesterday and Ore Sent to the Smelter.

Mr. David H. Beecher, president of the Winnipeg Mining & Smelting Company, is in the city on a short visit. Mr. Beecher stated yesterday that the work of pumping the workings of the Winnipeg had been commenced. Two carloads of ore, he said, were started from the

mine yesterday, and other shipments will be made from time to time. For the present, however, only the ore that is on the dump, and that which is taken out in the course of the development work, will be sent away. There are ample funds in the treasury with which to carry on the work. Mr. Beecher has just purchased the 200,000 shares of Winnipeg held by Mr. Duncan McIntosh, the former president of the company, and general manager of the mine. Mr. Beecher will leave today for a tour of the coast cities. He leaves for Spokane, and there he will be joined by Mrs. Beecher. From there they will go to Tacoma, Seattle, Victoria and return to Rossland via the Canadian Pacific. After a few days' sojourn here they will leave for their home in Grand Forks, North Dakota via the Crow's Nest railway. Their desire is to see as much of the country as possible while they are here.

Work to Be Resumed.

Work is to be resumed upon the property of the Golden Gate Mining Company. The company owns four claims on the western side of the lower portion of Arrow Lake. About \$2,000 worth of work has been done upon these claims. Operations were suspended in June of last year. The main ore shoot is 80 feet wide and 20 feet in length on the surface. The ore carries from 8 to 30 per cent copper. Operations will be resumed on Monday.

Snowshoe Is Looking Well.

Recent accounts from the Snowshoe mine at Phoenix report steady and continuous development. Over 20 men are being employed and the property is showing up very satisfactorily. A. J. McMillan, the managing director, is expected back from the old country tonight.

Gold Medalist of the Class.

The Tribune, of Deseronto, Ont., contains the account of the graduating class of the Queen's University at Kingston. The gold medalist in the class was Mr. George A. McGaughey, who was granted the degree of M. A. Mr. McGaughey is a first cousin of Mr. J. D. L. McGaughey, of this city. His father, Mr. A. H. McGaughey, was late general manager of the Grand Trunk railway.

Dog Poisoner at Work.

The dog poisoner seems to be as active as ever, but unfortunately it is not the curs that take the choice bits but thoroughbreds. At St. Paul street several dogs, however, did not appear to be strong enough to do the fatal work intended. Rewards have been offered for the would-be poisoners.

LEFT FOR CAPE NOME.

Mr. Sol. Cameron Will Try His Fortune in the Gold Fields.

Mr. Sol. Cameron, the well known contractor, left yesterday for Cape Nome. He had secured an interest in several claims there, and determined to go to the Cape and by doing some work on the claims to determine their value. If he finds that they are valuable he will continue to work them, but if not he will throw them up. He says he will be there about three months, unless he sees that there is a chance to make a fortune, and in that event he will stay by the Cape and come home in a year or two with a couple of hundred pounds or more of gold dust.

LIFE ON A FARM.

AS TOLD BY ONE WHO HAS UNDERGONE ITS HARDSHIPS.

Hard Work and Exposure to All Kinds of Weather Plays Havoc With the Strongest Constitutions—How Health May Be Obtained.

While life as a farmer is one of considerable independence, it is very far from being one of ease. The very nature of the calling is one that exposes its followers to all sorts of weather, and it is perhaps not surprising that so many farmers suffer from chronic ailments. Mr. Thomas McAdam or Donagh, P. E. I., is a fair example of this class. Mr. McAdam himself says: "I was always looked upon as one having a rugged constitution; but the hard work, coupled with the exposure incident to life on a farm, ultimately proved too much for me. About 18 months ago I was attacked with pains in the small of the back and thighs. At first they were of an intermittent nature, and while they were extremely painful would pass away after a day or two, and might not bother me again for weeks. As the attacks, after each interval, grew more and more severe, I became alarmed and consulted a doctor who said the trouble was lumbago. His treatment would give temporary relief, but nothing more, and ultimately I was almost a cripple. To walk, or even to move about in a chair, or turn in bed caused intense agony, and in going about I had to depend upon a cane. If I attempted to stoop or pick anything up the pain would be almost unbearable. This condition of affairs had its effect upon my whole system and for a man in the prime of life, my condition was deplorable. I think I had tried at least half a dozen remedies before I found relief and a cure, and this came to me through the use of Dr. Williams' Pink Pills, which a friend urged me to try. I felt some relief before the first box was all gone and by the time I had taken five boxes, I was as well and smart as ever, and although months have now passed I have not had any return of the trouble. My cure is entirely due to the use of Dr. Williams' Pink Pills and the only regret I have is that I did not try them at the outset. Had I done so I would not only have been saved much suffering, but considerable money as well."

Mr. John Elliott, Q. C., is in the city in attendance on the supreme court. He is one of the firm of Elliott & Lennie, barristers and solicitors, of Nelson.

LEDGES ARE LARGE

They Are From 100 to 300 Feet wide at Ollala.

THE ORE IS OF A GOOD GRADE

The Miners There Declare It to be a Second Roseland—A Concentrator to be Built and a Smelter Talked of—Railway is Promised—Other Mining Notes.

great deal of assessment work is being done in this camp, the sounds of blasting being heard from each side of the valley at all hours of the day. Among the claims that have shown up well since I last wrote are the Mountain Chief, Marblehead, Impacible, Wheel of Fortune and Daisy; on the last named an assay of \$83 in gold and on the others from 10 to 25 per cent in copper being the result. Many trails are being made up the various mountains and altogether the camp is making great progress in the matter of development. J. Buchan has bought out his partners in the Copper King, and it is the general opinion here that in that property Mr. Buchan has one of the best, if not the very best, in the camp. Several Roselanders are here, and all of them have excellent showings on their claims. Mr. Jeff Lewis, well known in Rossland as a successful prospector, spent five days here last week. He was accompanied by his brother, and both of them were more than pleased with the mineral showings of the camp. But they did not see all the great properties in the vicinity, having to leave unexpectedly. They promise to come back in a week or so, and Jeff says he is going to invest. He declares he never saw such magnificent leads, and after he returned from visiting the Bullion, where the ledge is from 100 to 300 feet wide and stripped for 800 feet, he said that if they intersect the lead in the tunnel now being driven towards it, they would have a bigger mine than all the mines in other sections put together. He wished he had come here last year. When he left he said he would come back as soon as he possibly could.

The owner of the Magdala did a little prospecting on the claim last week, and he finds that the ledge is quite 300 feet wide, being solid iron, carrying copper and gold for nearly all its width. It is one of the biggest things in the camp and if the rule proves true in this case there is a big body of copper ore beneath this immense iron cap. A rich strike has recently been made in the Black Diamond at a depth of about 50 feet. The lead runs directly into the St. Keverne, owned by a Roseland man, who has also some other good things. Although this camp is only as yet in the trial stage of its existence, there is very little doubt in the minds of those who have examined its adjacent mineral properties, that it has a great future. In fact, a "second Roseland" is the usual expression of visitors after looking over the camp a few days. We have got the mineral, the mines are close to the town and there is bound to be an ever increasing payroll. The town itself is progressing. Not so fast as it would be were lumber obtainable. It is now beginning to come in slowly, some from Armstrong, to the north of Okanagan lake, and some from Okanagan Falls, where Mr. Snodgrass has a mill. Seven houses are to be built at once on Main street, one of them an hotel, of course. Lumber, by the bye, is \$28 per thousand, but I understand that Mr. Snodgrass intends to either move his mill here or erect another. This will knock off \$4 a thousand on the price. Ollala is situated at the junction of Ollala creek with Keremes creek, about four miles north of the Similkameen river, and a more beautiful location for a town it would be hard to find anywhere. There is also ample water power to work all the mines by electricity. The name Ollala is derived from the ollala berry, which grows on bushes from 10 to 15 feet high. In April these bushes are a mass of white blossoms, and the berries ripen in July, when the Indians from far and near come here to pick them. There are several acres of Ollala bushes around the mouth of the creek, and they are not only ornamental but useful. They grow to the size of a black currant and are very sweet in flavor, of a dark purple color and hang in immense clusters. This morning (Sunday), for the first time in its history, church service was held in Ollala, the preacher being Rev. Mr. Crow, formerly of Toronto, but now located at Fairview, about 20 miles east of here. The service was held in the new store just erected on Main street by Mr. Meiklejohn of Vancouver, and the congregation numbered about 25, among them being two ladies. The collection was most liberal, averaging over \$1 for each person present. Mr. Crow rode over from Fairview last night and will again preach here the first Sunday in June. The townsite company will donate a lot for a church, so that the spiritual welfare of Ollala's population will probably soon be looked after, and a resident minister of one or other of the denominations may be expected shortly. It is stated that a concentrator will be erected here either by the Keremes Mining syndicate or an outside company, as it is so far proved that the ore of this camp are concentrating. I have it also from a good authority that a smelter will be built on some high ground about two miles distant, but of course that is a question for the future. Personally, if I decide to live here, I shall regret the advent of a smelter anywhere nearer than four miles. A great want in Ollala just now is an assayer. We have to send our samples to Princeton, 45 miles west, and sometimes have to wait two or three weeks for results. Well, all in good time, I suppose. The railway is assured, the right of way being already pegged out and the location line now being surveyed. The road will come down Keremes valley from Okanagan Falls, a few miles west of Fairview, then going four miles south to the Similkameen, will turn west and run along the river side nearly to Princeton, but will not go within 1000 or 1500 miles of that place. But when construction really commences Princeton may be

taken in, as it is a rising town. But, whatever may be the fate of Princeton, the railway must pass through Ollala. R. W. NORTHY.

Waverley Mines Will Resume.

After consideration of numerous schemes the shareholders of the companies organized by Grant-Govern hope that they have hit upon a plan whereby they may get back the money they have invested in these concerns. Some few years back Mr. Grant-Govern came out to British Columbia and organized the Goldfields of British Columbia, Limited, which had a nominal capital of \$371,642 in fully paid shares of \$1 each. The company acquired several claims in the neighborhood of Revelstoke, as well as several in the Shoal Bay district on the Coast. It also purchased the town site at Shoal Bay. A considerable amount of work was done on the Tangler and Waverley claims in the Revelstoke district, and subsidiary companies were formed to acquire and develop these properties. None of the companies, however, have had a very successful career, and for some time past all work has been suspended on all the properties. Recently the shareholders of the three companies held discussion and after considerable discussion agreed to amalgamate the various concerns under the title of the Empire Goldfields, Limited. The remaining sum of \$5, per share in the Tangler and Waverley companies will be called up, and this, with other assets, will, it is thought, provide ample capital for the development of the various properties. The Mining Situation. If the mining outlook should improve permanently it would mean a splendid time for trade throughout the north-west at this and future times, says the West Coast Trader, of Spokane. If the record of the past two weeks may be accepted as pointing to anything, an era of improvement has commenced. The fact that old established camps such as those of the Pend d'Oreille and Coeur d'Alene district, in Oregon, are being enlivened by recent and rich strikes and activity that had been almost entirely quiescent during some places, has been assumed, argues better for the industry than if new camps were being established. The tendency in this country during the past ten years has been towards a shifting of booms. The district is so large and offers such splendid opportunities that interest cannot be centered for a long time in one place. Aside from the labor troubles in the Coeur d'Alone, there was the deterring factor for several years that new districts were being opened in various parts of the tributary country, taking the interest away for the time being from the rich Idaho mines. Now the interest has again shifted back to them, and the probabilities are strong for the opening of the greatest mining section in the United States. Recently more interest has been taken in Republic camp. This was to be expected, as the season of the year has now arrived when machinery that has been delayed so long can be taken into the camp. A revival of activity and very prosperous times for Republic may be looked for during the next six months. If mills are erected and other proposed improvements to the facilities of the camp are carried out, there will be no more dull winters there. Much is to be expected in a mining way from the settlement of the Transvaal. It is true that no immediate cessation of hostilities in South Africa is to be expected, but the confidence of Britishers, which was seriously upset at the beginning of the war, is commencing to return, and they may be expected to again show a disposition to invest in our mines. Taking in the Montreal Sights. Montreal, May 21.—Gunner Moore of the Royal Engineers, who arrived on the Tunisian yesterday and failed to appear in time for the train to leave for British Columbia, was found this morning by Constable Corbett, on Craig street. Moore said he got lost while viewing the sights of the city. He left by the regular train today in charge of Constable Corbett, who will take him through to the coast.

CERTIFICATE OF IMPROVEMENTS.

Notice. Boundary No. 2 and Rossland Fraction mineral claims, situate in the Trail Creek mining division of West Kootenay district. Where located: On Maulde mountain, near the junction of the Red Mountain Railway with the International Boundary line. Take notice that I, Kenneth L. Burnet, F. M. C. No. B. 20146, agent for Charles Connell, F. M. C. No. 25330 A., P. McL. Forin, F. M. C. No. B. 29305, George Lemon, F. M. C. No. 155, special, and John Andrew Forin, Free Miner's Certificate No. B. 11138, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims. And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements. Dated this Seventeenth day of May, A. D. 1900.

CERTIFICATE OF IMPROVEMENTS.

Notice. Parker Fraction and Cecil Rhodes mineral claims, situated in the Trail Creek mining division of Kootenay district. Where located: On the summit of Sophie mountain. Take notice that I, J. A. Kirk, acting as agent for Arthur H. Greene, free miner's certificate No. B29034, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim. And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 10th day of March, 1900. J. A. KIRK.

CERTIFICATE OF IMPROVEMENTS.

Notice. Canada and Swan mineral claims, situate in the Trail Creek Mining Division of West Kootenay District. Where located: In Sophie Mountain on the Dewdney Trail. Take notice that I, F. A. Wilkin, acting as agent for the Summit Gold & Copper Mining Company, Limited, Free Miner's Certificate No. B 6775, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims. And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 25th day of April, 1900. F. A. WILKIN.

KENNETH MINING AND DEVELOPMENT CO., LIMITED LIABILITY

Rossland, May 10, 1900. I beg to give notice that a special extraordinary meeting of the above named company will be held at the offices of the company, Wallace Block, Columbia avenue, in the city of Rossland, on Thursday, the 28th day of June, 1900, at 4 o'clock in the afternoon, when the following resolutions will be submitted: 1. That it is desirable to reconstruct the Company, and accordingly that the Company be wound up voluntarily, and that Arthur Marsh, in the City of Rossland, in the Province of British Columbia, Esquire, be, and hereby is, appointed liquidator for the purpose of such winding-up. 2. That the said liquidator be, and hereby is, authorized to consent to the registration of a new company, to be named: "The Tamarac Mines, Limited," with a memorandum and articles of association which have already been prepared with the privity and approval of the directors of this Company. 3. That the draft agreement submitted to this meeting, and expressed to be made between the Company and its liquidator, of the one part, and "The Tamarac Mines, Limited," of the other part, be and the same is hereby approved; and that the said liquidator be and he hereby is authorized, pursuant to section 13 of the Companies' Winding-Up Act, 1896, one of the statutes of British Columbia, to enter into an agreement with such new company, (when incorporated), in the terms of said draft, and to carry the same into effect with such (if any) modifications as they think expedient. ARTHUR MARSH, Secretary-Treasurer. 5-17-71

IN THE SUPREME COURT OF BRITISH COLUMBIA.

In the Matter of the Land Registry Act and the Land Registry Act Amendment Act, 1898. And in the Matter of the Title to Lot 678, Group 1, Kootenay District, known as the O. K. Mineral Claim. Notice is hereby given that three months from the date hereof application will be made by the Old National Bank of Spokane, Washington, to the Honorable Montague Williams Tyrwhitt Drake, one of the Judges of the Supreme Court of British Columbia, for an Order directing the Registrar General of Titles to register the Old National Bank of Spokane, Washington, as owners in fee of Lot 678, Group 1, Kootenay District, known as the O. K. Mineral Claim, notwithstanding the non-production of the prior documents of title. And further take notice that any person claiming to have interest in said land and desiring to oppose said application must attend at the Chamber Court, in the Court House, Government street, Victoria, B. C., on Thursday, the 12th day of July, 1900, at 10:30 o'clock in the forenoon, at which time and place the said application will be heard. Dated this 12th day of April, 1900. BODWELL & DUFF, Solicitors for Applicants.

Notice of Stockholders Meeting.

The general annual stockholders' meeting of the Lucky Boy Mining and Development Company, limited liability, will be held at the company's office in the city of Rossland on May 28, 1900, at 7:30 P. M. S. L. MYERS, President.

The Welland Canal Outrage.

Welland, Ont., May 21.—The trial of Dullman, Walsh and Nolan, the first named charged with complicity and the other two with having attempted the destruction of lock 24 of the Welland canal, comes up for trial in the county court tomorrow. The Halifax Garrison. Halifax, N. S., May 21.—Private N. McGlamigan of the third service battalion of the Canadian garrison, died at the military hospital here last evening. He belonged to Perth.

CERTIFICATE OF IMPROVEMENTS.

Notice. Firefly mineral claim, situate in the Trail Creek mining division of West Kootenay district. Where located: One mile south of Rossland, adjoining the Nest Egg mineral claim. Take notice that I, F. W. Rolt, free miner's certificate No. B. 13,321, acting as agent for the Nest Egg and Firefly Gold Mining Company, free miner's certificate No. 19062 B, intend 60 days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim. And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this nineteenth day of April, 1900. F. W. ROLT.

CERTIFICATE OF IMPROVEMENTS.

Notice. Canada and Swan mineral claims, situate in the Trail Creek Mining Division of West Kootenay District. Where located: In Sophie Mountain on the Dewdney Trail. Take notice that I, F. A. Wilkin, acting as agent for the Summit Gold & Copper Mining Company, Limited, Free Miner's Certificate No. B 6775, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims. And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 25th day of April, 1900. F. A. WILKIN.
