

FACTS ABOUT TEA SERIES—No. 8

The Consumption of Tea

Tea as a beverage is used in nearly every country in the world. It is estimated over 200 billion cups are consumed annually. Australia leads in tea drinking with an annual per capita consumption of about nine pounds, which means that every Australian consumes from six to eight cups of tea every day. The consumption per capita in England is 8½ lbs., and in Canada nearly 5 lbs. In the United States, it is less than 1 lb., but this is largely because Americans have not been able to get fine teas until comparatively recently. "SALADA" is considered one of the choicest blends on the market, and is the largest selling tea in either United States or Canada.

"SALADA"

Dr. D. R. Moore Of Stanley in Car Accident

Dr. and Mrs. D.R. Moore, Stanley had a narrow escape from injury on Wednesday morning when the closed car in which they were driving to Fredericton became ditched and

turned over on its side after slewing around in the opposite direction near the Dunbar Bridge, 13 miles from the city. Neither Dr. Moore nor Mrs. Moore who was driving at the time, sustained any injury beyond a bad shaking up. They were en route to Fredericton to catch the train for St. John's.

HAVE YOU TASTED THE NEW IMPROVED "G.B." COATING?

DO YOU know that it has taken Ganong Bros. over fifty years to perfect the NEW IMPROVED "G.B." coating that seals their exquisite centres? If you have not tasted it lately, then your palate still ignores the most noteworthy achievement in candy-making in years. Your palate deserves the best. To make sure of at least tasting the NEW IMPROVED "G.B." coating, look for the "G.B." mark on the individual piece and on the box as well.

Made by GANONG BROS. LIMITED
at ST. STEPHEN, N.B.

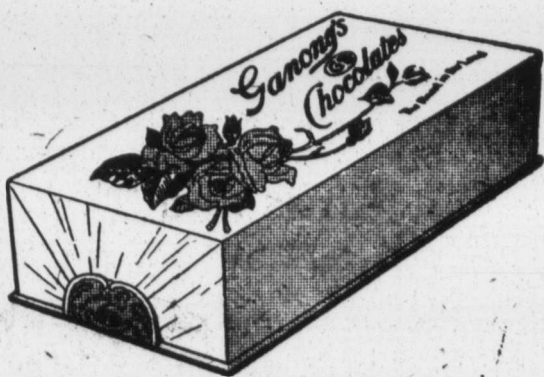

Ganong's

CHOCOLATES

The ROSE Box

A popular assortment at a popular price. Value unequalled at 75c. the pound. 18 favourite kinds, more and daintier pieces, heavily coated with New Improved "G.B." coating. Also in ½, 1 and 2lb. sizes.

Army physicians well know that "the administration of sugar (sweets) delays the onset of fatigue and consequent nervous exhaustion." Eat more candy!

NEW BRUNSWICKERS AT ST. FRANCIS X.

Newcastle Student Wins in Chemistry.

At the commencement exercises of St. Francis Xavier University, Antigonish, N.S., Wednesday the Master of Arts degree was conferred upon Arthur Chaisson and Frederick Jennings both of St. John, and Miss Marguerite Michaud, Buctouche: all of whom were graduated from St. F.X. last year. Miss Marion Agnes O'Leary, Raymond S. McMurray, William J. Murphy, Gerard Francis Dalton all of St. John, and Gerard Chevrete De Belleisle of Campbellton received the degree of Bachelor of Arts; Lionel A. McIntyre of St. John as awarded the bachelor of Science degree. The valedictory was delivered by Gerard C. Belleisle. Campbellton. Five prizes were won by New Brunswick students and another was equally merited and lost in the draw as follows: Highest aggregate in freshman year won by Arnold Burgess, Grand Falls. Religion won by James Nugent, St. John; Chemistry won by W. A. Campbell, Newcastle; Science won in the draw as follows: Highest freshman religion, merited by Arnold Burgess, Grand Falls, N.B. and Vincent MacDonald, French Road, N.S. won by Vincent MacDonald.

GRAND FALLS PLAN LIKELY TO RECEIVE O. K. CONDITIONALLY

Washington, May 13—The United States members of the International Joint Waterways Commission will leave here tomorrow for the final hearing in Montreal Friday on the application of the New Brunswick Power Commission for permission to construct a great hydro electric power project at Grand Falls on the St. John River. Under permission of the commission to file briefs and statements, such briefs and statements have been filed by Attorney General Raymond Fellows for the State of Maine by the Government of the United States through the State Department by the Canadian National Railway and International Paper Company and Grand Falls Co. Ltd.

The State of Maine takes the position that it is anxious for development of the Saint John River but the development must be with due regard to full protection of property rights in Maine and assurance that Maine will get her share of the power. It is pointed out that the project will result in permanently raising of the water for at least 29 miles of the boundary Maine suggests conditional approval of the improvement with the understanding remedial or protective works are to be built. Recognition of present and vested rights is also demanded.

The United States Government asks the Commission not to approve the application for the project until it has made a full investigation.

The Canadian National Railway serve notice that they must be protected from any injury due to raising of water levels and the like. The International Paper Company and Grand Falls Company, through counsel, John W. Davis and George H. Montgomery point out that land held by these companies will be flooded. They insist that they be safeguarded against damage.

Belief here is that the project will be approved conditionally by the commission.

Operations to Be Made Safer By Propylene

The University of Toronto is fast laying claim to leadership in the world of medicine and surgery.

The latest research work of its representative touches a new phase in anaesthetics which promises to make surgical operations much more safe for the patient, as was demonstrated at the University, when Dr. W. Esson Brown submitted a test. Up to the present thylene has been regarded as the last word in anaesthetics, but the new gas propylene, it is claimed, gives promise of becoming a greater boon to humanity than the previous discovery of Toronto men.

ST. JOHN BOARD OF TRADE PASS STRONG RESOLUTION

Passed by Council Saint John Board of Trade, 12th. May, 1923.

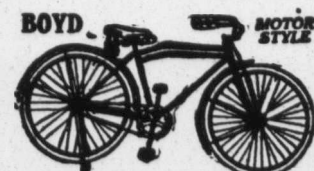

WHEREAS the Lumber Industry of New Brunswick now labors under acute depression which has already resulted in the number of operating concerns and thus deprived many workers of their normal source of livelihood; and

WHEREAS the economic importance of our Lumbering Industry is fundamental in the most literal sense, therefore, it follows that the adversity from which it now suffers is closely and most depressingly reflected, directly and indirectly, upon practically all other lines of business and thus upon the whole people of the Province:

THEREFORE BE IT RESOLVED that the Saint John Board of Trade do respectfully urge upon the Provincial Government the pronounced gravity of the above situation and express the sincere hope that thoughtful means toward all possible relief be taken without delay say, in the form of a reduction in the present Stumpage charge and the institution of a Scale basis more consistent with the present size of logs, so that the Lumber Operators of New Brunswick may, at least, be placed upon a more hopeful footing with their Quebec competitors in the markets of the United States. Further, that a copy of this resolution be sent to the Premier, the Honorable P.J. Veniot the Acting Minister of Lands and Mines, Hon. J.E. Hetherington and to each of the Saint John members of the local legislature. Also to the leading Boards of Trade and similar organizations, and to the principal newspapers throughout the Province.

To Gather At Camp Sussex June 16

It was announced at military headquarters last week that the following units will leave on June 16 for Camp Sussex where they will remain eight or nine days in training: Hussars, Dragoons, Carleton Light Infantry, York Regiment, North Shore Regiment and the New Brunswick Rangers are to attend. The Saint John Fusiliers will not go to Sussex this year as they have done for the past two years for their summer training. It is believed this unit will go to Red Head where they will go into training for a few days.

Good News For Rheumatic People

Now Known That This
Trouble Must be Treated
Through the Blood.

The most a rheumatic sufferer can hope for in rubbing something on the tender, aching joint is a little relief. No lotion or liniment ever did or ever can do more than this. The rheumatic poison is rooted in the blood. To get rid of it you must treat it through the blood. Any doctor will tell you that this is true. If you want something that will go right to the root of the trouble in the blood, take Dr. Williams' Pink Pills. The whole mission of this medicine is to purify and enrich the blood, and when they do this all blood troubles, including rheumatism, disappear. Among those who have proved the value of Dr. Williams' Pink Pills is Mrs. Annis Wright, Woolchester, Alta., who says: "I was a sufferer from rheumatism for six years, and during most of that time my life was one of misery. I tried several doctors, and many remedies recommended, but never got more than temporary relief. The trouble seemed to affect my whole system and I was badly run down and suffered from headaches as well. Finally I was advised to try Dr. Williams' Pink Pills, and through these I found complete relief and today I feel like a new person. I can therefore strongly recommend Dr. Williams' Pink Pills to anyone suffering as I did from this trouble."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Count of Noses in New York to be Made

New York, May 12—Thousands of enumerators, the majority of them women, will set forth on the first day of next month to take a count of the men, women and children resident in the State of New York, together with the facts relating to their age, race, occupation, citizenship etc. The census will be the first that has been taken in this State since 1920 and is expected to show a substantial increase in population.

The taking of the Empire State census is a task of huge proportions. It also involves great expense as is evidenced by the legislative appropriation of over one million dollars for the work. For the first time women will be largely employed as enumerators. It is expected that each enumerator will interview an average of 1,500 persons.

The first New York State census was completed in 1786, three years after the close of the Revolution. The results showed that there were at that time 238,897 persons in the State of New York—fewer than the number of inhabitants of many of the cities of today. There were a dozen counties in the State at that time. Now there are sixty-one. The census did not cover the western part of the state for that territory at the time was little more than a hunting ground for the Indians. Such flourishing cities of today as Rochester, Syracuse, and Buffalo did not exist. The census did not take count of the Indian resident but did include "negro slaves", of whom the figures showed there were 9,500 males and 9,300 women.
