farmer's cubs, and said he did not like the the toast of the "Industry" the block of the block o

Fireside.

Ontario was dependent upon the success tion of stock m order to keep out diseases, we should endeavor to get the best stock from any quarter. (Applause.) What would our horses and cattle be had we shut our ports against the large im-portations which hid been made? The horses imported into Çanada had made k ahead of anything in any State in the Union. (Applause.) Our Local Government had taken a keen interest in agriculture, and in spreading useful knowledge among the farming classes, as was instanced by the Ontario Agricultural commission. (Hear, hear.) The speaker then urgel the agriculturists present to maintain the fertility of the

soil, by keeping their coarse grains, and using the product of the soil as much as possible on their own farms. He said that it was most important that the sires of stock should be good. If male animals of the parest breeds are not used, notwithstanding the quality of the female the stock will generate. The difference between a good sire and dam in breeding was fully 30 per cent. in favor

of the male animal. Poor animals consume as much fool as good grade steers. It is a suicidal policy to use poor animals. Hear, hear.) In using poor annulas. (Hear, hear) in using improved sires in breeding cattle 'our farmers are pursuaga podey, which will place them at the 'top of the tree,' as our horses now are. As to the question of beef or milk, he heard from a good authority that good animals for both doiry and hor pursues and a wild work he authority that good animals for both dairy and beef purposes could easily be raised by a judicious crossing. He be-lieved a better system of dairying could be adopted in this country in this coult ty, and described in a creamery at Kirk cream practised in a creamery at Kirk and w. T. Whitely. The President of the Society," Mr. Wm. Young was enthusiastically greeted. Illinois. The demand for first class but-in England is unlimited. The speaker related the experience of a Canadian maker who had brought some choice samples of butter to the old country in' tin boxes, and who sold his consign-ment at a very high figure after having shown it to competent judges. Farm-ers, too, should be careful how they used their soil. Mr. Rennie, an extensive breeder, had told him that from the time he had begun to raise cattle he never sold any coarse grains, but had utilized his crop in feeding his stock, and getting it all back in manure, and thus his soil was not exhausted. He did not believe

in keeping cattle going round around straw stacks. (Laughter and applause.) One of the main sources of profit to the Canadian farmer is the saving of manure. Manure should be kept from the sun and rain. in order that it should not get dry or leached. The stabling should be bo arranged that the manure could be well caught and kept from exposure. The

caught and kept from exposure. The lands needs to be fed; the system of crop, cropping is suicidal. Farmers have ourselves to blame of their boys leave the farm. (Hear, hear.) The speaker eloquently alluded to the nobi-lity of agriculture, and claimed that it could be made attractive to their chil-dren. If we feel that dignity of our position, and live up to that dignity, we can make ourselves respected, and our calling honored in this country. Mr. McMillan concluded a forcible, practic.d McMillan concluded a forcible, practical
