Souvenirs of Aylmer at Caughell's.

Mr. W. C. Bingham had a strange experience a few days ago and one which few people would have the nerve to go through. He was driving out towards Kingsmill to look after his bees and when nearing the farm saw a swarm going over which he knew would be lost unless he took prompt action. He managed after considerable work to call them down and they soon began to gather in a big bunch on a fence rail. He then commenced a search for the queen bee and when he found her he pinched her head off. When their queen is lost a swarm of bees will nearly always return to the hive from which they came, but as these did not seem inclined to go, Mr. Bingham took his whip and began brushing them off the rail. Instead of going they began to gather on Mr. Bingham's breast and gradually covered him from his chin down to his knees several inches thick. He stood still and allowed them to gather. They soon formed a complete bridge from one leg to the other and hung in a bunch below. Then came the critical part of the programme. With this buzzing mess of thousands of bees hanging to him in such a manner that he could only take short steps, he moved off towards the farm about a quarter of a mile away and reached the hive without any mishap. He shook the bees off in front of the hive and got them all safely inside without being stung once. If he had been in his place there would have been nothing left but a bunch of bee stingers in human form lying in the fence corner.
