88 and 90 Walker Street, NEW YORK CITY.

All communications, adver-  
tisements, etc., intended for in-  
sertion in "The Trade Review"  
should reach this office by Wed-  
nesday morning.

There were more quotations  
from the **TRADE REVIEW** last  
year in Canadian, American and  
English papers than from all the  
other journals of its class com-  
bined, that are issued in the  
Dominion.

There has been considerable business in  
grain freights during the past week for  
the St. Lawrence route, a large quantity of  
wheat having been engaged from Duluth  
to Montreal at 5½¢ per bushel. Quite a lot  
of wheat has also been chartered at Fort  
William for Montreal at 5½¢, and consid-  
erable oats at 4½¢ per 34 lbs.

Recent advices from France state that  
the sardine fishermen have struck. It was  
only a short time since that a strike of the  
solderers in the French sardine factories  
was settled, and work resumed after a  
long period of idleness. The fishermen  
object to the present methods of fixing  
prices on fish as it arrives at the wharf,  
and want one of their own choosing to  
name prices. The men are reported to be  
violent.

Within the week the first sales of new  
crop California prunes have been made.  
The quantity sold approximated 20 car  
loads and the price paid was about 1½¢  
per pound less than the first prunes sold  
at a year ago. The goods were sold for  
September shipment, although according  
to some reports, they were not to be start-  
ed from the Coast until early October.  
Since these sales were made the Coast  
market has stiffened somewhat, and at

present writing there are no sellers below  
3¢ in bags and 3½¢ in 50-lb boxes, an ad-  
vance of one-eighth of a cent on the prices  
paid so far.

About the middle of August the Scotch  
salmon are exhausted and London loses its  
chief source of supply for this delicious  
fish. In order to fill the aching void, one  
or two London dealers have made arrange-  
ments with the C. P. Railway for the ship-  
ment of British Columbia salmon to Lon-  
don via Montreal, until the close of navi-  
gation, and then via St. John, N. B. The  
salmon will be shipped in cold storage  
departments.

In a recent decision in the case of the  
German-American Real Estate Title Guar-  
antee Company vs. Courten, Justice Daly  
of the Appellate Term of the U. S. Supreme  
Court held that where a contract for title  
insurance is made, one condition being  
that a survey is to be furnished by the  
insured and the survey so furnished is in-  
accurate and fails to show encroachments,  
the insurer is not bound to offer a policy  
containing no encroachment exceptions,  
but can recover upon offering a policy  
with such encroachments excepted as in  
fact exist.

According to the statement of local deal-  
ers in borax, the recent union of the Pacific  
Coast Borax Company with Redwood &  
Sons, chemical manufacturers, of Eng-  
land, does not have the significance that  
recent press dispatches claim for it. It was  
claimed that the borax output of the  
world would practically pass into the  
hands of the new concern. It is stated by  
local dealers, however, that the com-  
bination will probably control the bulk of  
the trade in this country, but that there  
are large concerns in England which get  
their supplies from Asia Minor and which  
will be able to offer active competition to  
the combination in outside markets.

## OUR OWN REPRESENTATIVE GOING.

Owing to the great interest now  
being taken in the mineral wealth of  
British Columbia, the **Trade Review**  
has resolved to send a representative  
expert to Rossland, B.C., to examine  
and report upon the resources of that  
now celebrated territory known as  
the Trail Creek region. He will care-  
fully inspect the prospects and proper-  
ties and will forward to us full re-  
ports of his observations, which,  
coming from an unbiased source,  
must be of great interest to our  
readers.

Cable advices from France state that  
the sardine fishermen have struck. It  
was but a few days since that a strike of  
solderers in the French sardine factories  
was settled and work resumed after a  
long period of idleness. The fishermen  
object to the present methods of fixing  
prices on the fish as it arrives at the wharf,  
and want one of their own choosing to  
name prices. They are violent in their  
demands, and only last week, the report  
says, almost killed one of the managers of  
a prominent factory because he would not  
agree to what they asked. The cable  
states that the value of the fresh has  
doubled within a week. The French mar-  
ket is reported to be bare of boneless  
sardines. There has been no fishing as yet  
in Portugal.
