

In the synonymy of *populea* Kalt., the third reference, Cladobius should be omitted and Kalt. inserted in parenthesis after *populeus*. Whether or not the word was written thus, and not Cladobius, I have been unable to prove. The first edition of Passerini's Gli Afidi was published in 1857. I have not been able to see this nor the 1860 Parma edition. Wilson's reference, however, is incorrectly written. So also is his reference to Aphididæ Italica, 1863. *Pilosa* Buckton is cited twice. In the second citation it is indicated that the species was not described as a Pterocomma, but was referred to that genus by Wilson. In writing the name *populea* in connection with Pterocomma, Kalt. should be in parenthesis.

On page 355 *Aphis salicis* Harris is discussed. This is a misprint for *salicti* Harris, named on page 191 of the first edition of Harris' work. The same is seen in the citation of Oestlund, etc. In listing *smithiæ* as a Pterocomma, Monell, which is incorrectly spelled, should be in parenthesis.

In the list of species on page 347, the genera in which they were originally described are placed in parenthesis between Pterocomma and the specific name. This is the method given in the international code for the indication of subgenera.

All of these little details are very minor matters, but they are here mentioned for purposes of reference.

KEY TO THE SPECIES OF PTEROCOMMA

1. Cornicles without a distal flange and abruptly constricted at the distal extremity.....*floculosa*.
 Cornicles with a distal flange and not so abruptly constricted at their distal extremities.....2.
2. Cornicles about twice as long as their greatest diameter *smithiæ*.
 Cornicles much more than twice as long as their greatest diameter.....3.
3. Cornicles about equal in length to the hind tarsi.....4.
 Cornicles much longer than the hind tarsi.....6.
4. Beak reaching to the cornicles or nearly to them.....*populea*.
 Beak reaching only to the hind coxæ or not quite to them.....5.
