The KEYSTONE

Percussion Core Drill Attachment

is an economical appliance for

TESTING COAL LANDS.

It can be used in connection with any good "churn" drill, but operates best on the long-stroke KEYSTONE, thus making the cheapest and quickest method of boring to be found. In operation a hole is sunk to the coal with the ordinary Rock Bit. The Bit and Stem are then removed and the Coring Attachment put on in their place. It takes a 4 ft. core out of the Softest as well as the Hardest part of the vein. Avoids all delay and expense of "rods" water wash, diamonds, shot, and heavy operating mechanism.

Price of Complete Attachment
\$200.00

Catalog No. 2 B. is a book on the subject.
We make Water, Oil & Test Well Drillers
for all depths and purposes.

Keystone Driller Co. Beaver Falls, Pa.

**ONE
MAN'S
VIEW.**

A well-known mining man recently finished an inspection of the ANTHRAHITE coal fields of Pennsylvania. When asked what impressed him most, he said:—

"The acidity of the water, and the fact that of all the pumps I saw there two out of three were Jeannesville Pumps."

"an indication at least that we know how to handle the acid water problem."

When you send us the lift and quantity of water and the available power, we will send you complete information about what we can do for you.

Our bulletin No. 5, fresh from the printer, is full of up-to-date information. Write for it now before you forge.
