

and finally came to see that he was mistaken. Then he worked for the affiliation of the Royal Medical College to the University, and ever since the Medical College progress has been steady. Ten years ago Dr. Knight was appointed Professor of Animal Biology and Physiology, and has done noble service, as the medical valedictorian attested. The next onward step was to place Dr. W. T. Counell in the position of Professor of Pathology and Bacteriology, to which subject he should give his whole time. The third stage of progress was the extension of the building last year.

The Principal stated that the medical professors intended expending \$6,000 more for equipment, so as to make the institution one of the best in the land. It was a shame, he declared, that the faculty had been allowed to extend the college by putting their hands in their own pockets. They were worthy of support, and he intended to be the first to contribute to the equipment fund. He had seen many colleges and hospitals in Canada, the United States and Great Britain, and he was proud of the Kingston General Hospital and the Medical College.

Principal Grant referred to the Canadian soldiers who had died at Hart's River, in the Transvaal. It was a proud moment for him when he read Kitchener's despatch, which named as leader of the gallant band Lieut. Bruce Carruthers, vice-chairman of the Kingston School of Mines, who had contributed so liberally to the University, and taken such an interest in it.

"But one thing I mourn," continued the Principal, "the Canadians are there on their own account; they are not our soldiers, for they are paid by the old country. They are merely individual volunteers, and the credit is due to them individually and not to Canada. I desire to pay tribute to the heroism of those Canadians who died at Hart's river in South Africa."

The following is a list of the graduates and prize-winners :

W. W. Amos.....	Kingston.
G. H. Bleeker	Trenton.
J. V. Connell	Spencerville
