

Medicinal Food.

This Original and World Renowned Dietetic Preparation is a substance of Unrivalled Purity, and Medicinal worth.

A solid extract derived by chemical process from very superior growths of wheat—nothing more!

It has justly acquired the reputation of being

The Standard Dietetic Preparation.

and has been recommended and certified to by a large number of chemists and physicians representing a very high degree of medical science as the Salutary for Invalids and the Aged, a Superior Nutrition in Continued Fevers and a Reliable Nutrient in all diseases of the Stomach and Intestines; (often in instances of consultation our patients whose digestive organs were reduced to such a low and sensitive condition that the Granum was the only thing the stomach would tolerate when life seemed depending on its retention,) and an incomparable Aliment for the growth and protection of Infants and Children; we do not hesitate however in saying that no food for the nursing can at all compare with a healthy mother's yield of milk, but when the breast fails to give sufficient quantity of nourishment, or the mother's milk is lacking in nutritive substance, — The Imperial Granum is, as has been proved in thousands of cases,

The Safest Food

Unlike these preparations made from animal or vinous matter, which are liable to stimulate the brain and irritate the digestive organs, it embraces in its elementary composition that which makes strong bone and muscle; that which makes good flesh and blood; that which is easy of digestion, never constipating; that which is kind and friendly to the Brain; and that which acts as a preventive of those Intestinal Disorders incidental to childhood.

And while it would be difficult to conceive of anything in Food or Dessert more Creamy and Delicious, or more Nourishing and Strengthening as an Aliment in Fevers, Pulmonary Complaints, Dyspepsia, and General Debility, its pure Medicinal Excellence in all Intestinal Diseases, especially in Cholera, Dysentery, Chronic Diarrhoea, and Cholera Infantum, has been incontestably proven.
