

diarrhoea by a regimen of boiled water, cooled to a suitable temperature, and given in small quantities every hour or half-hour, or as thirst demands, to the exclusion of all food for eight, twelve, or even twenty-four hours. By diluting the irritating secretions, dislodging the debris of decomposed alimentary matter retained in the folds of the mucosa of the canal, increasing the pressure in the blood vessels and dissolving the toxins attached to the formal elements, and ingested water carries away and eliminates the poison from the system, changes the morbid character of the stools and effects a reduction of the temperature and recovery, especially when administered in acute cases at their commencement and in children not very young.

ICE can be noiselessly broken by using a hat-pin. This is an excellent sick-room suggestion.
