

LIGHT

Daylight costs nothing. Luxfer Prisms bring it into dark places.

The saving you make is worth the trouble of getting our booklet and learning how to discard artificial light.

The booklet is free.

147 FRONT ST. EAST. TORONTO.

BAND AND CIRCULAR RE-SAWS

are a necessity in a saw-mill. They increase the capacity of a mill one-third when logs are small, by slabbing heavy and re-cutting all slabs on re-saw, using a 19-gauge blade.

They make two plump boards out of a bad face deal.

Transfers supply them and not over four extra men required to run one.

If some large mills can use three and four, you can surely find one profitable. Will be pleased to send you particulars and prices.

WATEROUS, BRANTFORD CAN.

Heat vs. Leak

The Radiator that doesn't leak—heats! The Safford Radiator (for Steam or Hot Water heating) heats. All other Radiators whose joints are packed and connected with bolts or rods must leak, sooner or later. Where there's a leak there's less heat, of course.

As originators of the Screwed Nipple Connection for Radiators, we have developed the largest business of the kind under the British Flag—naturally we are proud of it—but we are not above taking small orders; our success hasn't gone to our head.

Toronto's City Hall and Court House are fitted throughout with **SAFFORD RADIATORS**
