

John Ballantine & Company

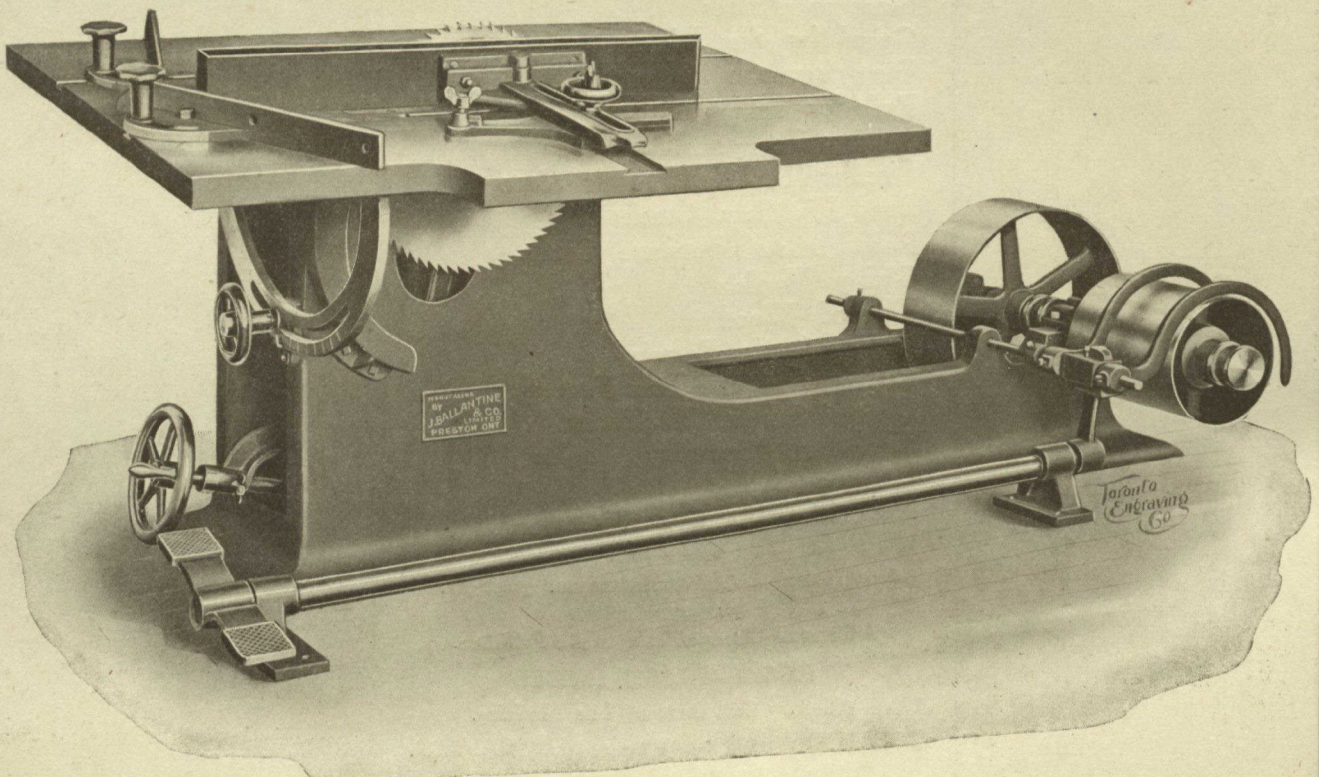

LIMITED

PRESTON, - ONTARIO

MANUFACTURERS OF SUPERIOR

WOODWORKING MACHINERY

When buying machinery, get machines that you can depend on. Do not experiment with lower grade machines because of a slight difference in first cost and then spend many times the difference in repairs and lost time. Ballantine machines are always reliable. Their first cost is the whole cost.

IMPROVED DIMENSION SAW TABLE.

With a most convenient belt shifter operated by foot-treadle. Extra long drive belt six inches wide. Large table tilts to any angle. Machine can be used with Rip Saw, Cutting-off Saw or Grooving Head. Weight 1,435 lbs.

BALLANTINE'S—THE BEST.
