

CONTENTS

1. Overview of Canadian Energy Scene
 2. New and Renewable Energy in Canada
 - Introduction
 - 2.1 Oil Sands and heavy oils
 - 2.2 Oil Shales
 - 2.3 Alternative Liquid Fuels
 - 2.4 Conventional hydro-electricity
 - 2.5 Small hydro
 - 2.6 Geothermal
 - 2.7 Ocean energy
 - 2.8 Wind
 - 2.9 Solar Thermal
 - 2.10 Photovoltaics
 - 2.11 Biomass
 - 2.12 Peat
 - 2.13 Conservation and Efficiency
 - 2.14 Summary of main areas of Canadian expertise
 3. Application of New and Renewable Technologies in Developing Countries
 - 3.1 Introduction
 - 3.2 Supply and demand
 - 3.3 Energy in the context of social and economic development
 - 3.4 Energy Planning in Developing Countries
 - 3.4.1 Energy supply and demand assessment
 - 3.4.2 Institutional problems
 - 3.4.3 Financial incentives/disincentives
 - 3.4.4 The technological dimension
 - 3.5 Opportunities for International Cooperation
- Annex A
- Annex B
