

Composite System

See Fig 4.6a shows the same product ready to be wrapped with bubble wrap and cushioned with plastic peanut (or popcorn) packing. Fig 4.6b shows the product packed and ready for carton filling with packing and then closure. Although retail costs are lower, at \$3-4.00, void filling and thus security would not be as good.

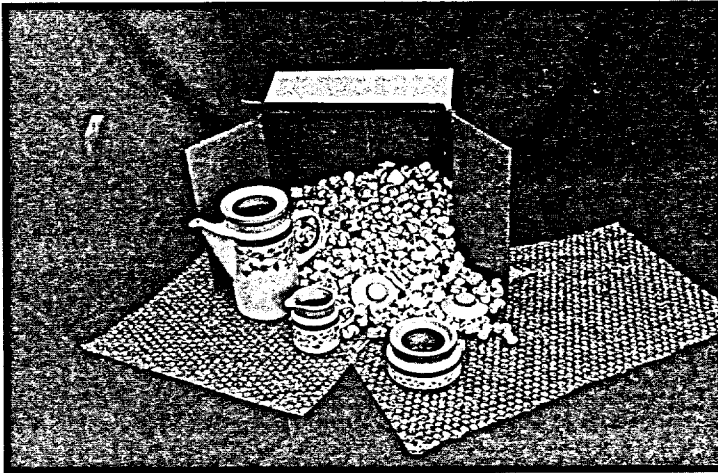

Figure 4.6a

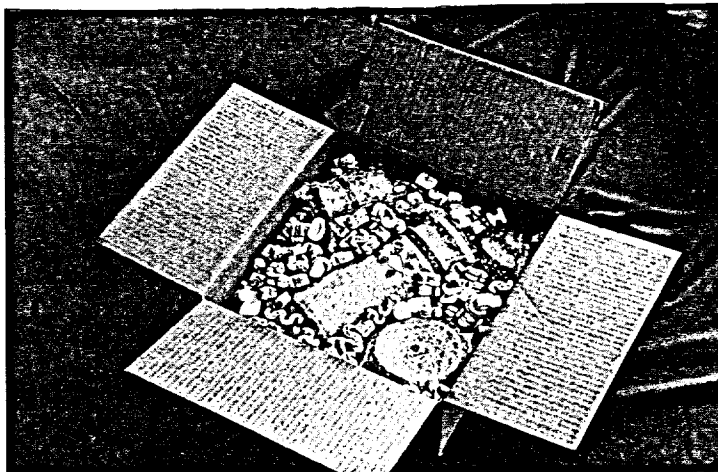

Figure 4.6b

In all cases ensure that there is at least 2-3cm space, filled with packing material, between the product and the carton wall.
