

ECLIPSES.

There will be in 1839 only two Eclipses, which is the smallest number that can happen in one year, both of the Sun, and both invisible to the inhabitants of Lower Canada, viz:—March 15th, a total Eclipse of the Sun will commence on the Pacific Ocean, in long. 96° 37' W., lat. 32° 24' S., and cross the Southern Continent of America, the Atlantic, and Interior Africa, ending near Egypt—visible as a partial Eclipse in most countries of Europe. Sept. 7th, an annular Eclipse of the Sun will commence near the Japan Islands, and cross the Pacific Ocean, ending near South America, in lat. 20° 50' S.

COMMENCEMENT OF THE SEASONS.

SPRING—March 21st, at 2h. 8m. morning.
 SUMMER—June 21st, at 11h. 15m. morning.
 AUTUMN—September 23rd, at 1h. 21m. evening.
 WINTER—December 22nd, at 6h. 38m. morning.
