POOR COPY

"Advance" Scientific Miscellany.

A new theory of the so-called fascination of birds by snakes is that the bird mistakes the snakes tongue, which the reptile keeps in constant motion, for a lively worm, and watches it with the expectation of devouring it.

Experiments of M. Gautier appear to prove that human saliva possesses the same poisonous property as that of serpents, although in a milder form.—The human saliva injected under the skin of a bird caused death, with symptoms very closely resembling those resulting from serpent bites.

Celluloid is being used in Paris for making stereotype plates. The mould is taken in a special cement, which quickly hardens after receiving the impression. The sheet of celluloid is then used to obtain the impression to be employed in printing. This substance has also been used for giving typographical representations of lace, the impressions being taken from the lace itself.

The brilliant light of the electric arc is found to be much less dangerous to the eyes than was for some time believed. So high a medical authority as the London *Lancet* reports that but one case of serious injury from exposure to the dazzling light has come under its notice, and in that instance the exposure was unusually severe and prolonged.

In St. Petersburg use has been made of electricity in pumping water, with a view of making it serviceable, in putting out fires. The experiments seem to have been satisfactory. The same current used for lighting a building may thus furnish power for throwing water on the flames in case it should take fire. Such an application ought to be especially valuable in the case of theatres and other buildings where large numbers of people assemble, and where the prompt introduction of a stream of water might be the means of averting a great loss of human life.

Enthusiasts who make a special study of sun-spots and attendant phenomena believe that the corner-stone of a new science is now being laid by the discovery of an intimate connection between terrestrial storms and activity of the heated gases surrounding the sun. Just what the connection is they are not yet able to clearly define, although electricity is suspected of being the agent through which the effects are manifested upon our planets. It is known that the gaseous envelope of the sun is affected by eruptions of such prodigious magnitude as to be utterly beyond our power of conception, these disturbances appearing to us in the form of rapidly changing spots on the solar disk. The spots come and go at remarkably regular intervals, a complete cycle of the various stages of activity from maximum to minimum and again to maximum being performed in about eleven years—the so-called "sun spot period." The present year has been one of great solar convulsions, and sun-spot physicists have been taking measures to vertify theories that sun-storms produce a marked effect upon the earth and its inhabitants. Their views seem to be strongly confirmed. While the present has been a year of violent terrestrial storms and earthquakes, these scientists claim to have proven by simultaneous observation, a correspondence between minor meteorological phenomena and changes upon the sun. The eminent meteorologist, Prof. Piazzi Smith, Astronomer Royal for Scotland, with many others, are of the opinion that the state of the sun will some day become an important factor in weather forecasts and similar calculations.

One of Proctor's most interesting lectures treats of astronomical time and the ages of the planets, commencing with the earth. From the different geological features of the earth's surface, it has been computed that the formation of its crust must have alone occupied 100,000,000 years. Such is the estimate formed by Crowe and accepted by Sir Charles Lyell. From the investigations of various physicists and experiments by Bischaff, it is found that 350,000,000 years must have elapsed while the earth was cooling from 2000 degrees to 200 degrees of temperature. Prior to this again, the earth existed for a long period in a nebulous condition. The earth may, therefore, be fairly assumed to be 500,000,000 years old—and this is considered as erring to the side of deficiency rather than to excess. Comparing this planet with Jupiter, on the principle that the larger a body is, the longer must be its time of cooling, it is calculated that it will be 3,500,000,000 years before Jupiter reaches the stage our planet has now attained. Ten times as long a period must pass before the sun arrives at a similar condition. The moon was in this relative period of her existence 420,000,000 years ago. If any planet is of nearly the same age as the earth it is Venus. Mars is older, Mercury is older still; the moon, the oldest of all. The features of Venus must nearly resemble those of the earth. Mars is about equally divided into land and water, and must have an atmosphere. The moon pictures the earth's future condition. It is a dead world. It has neither water, clouds, nor atmosphere. But, as the earth is 81 times larger than its satellite, while it has thirteen times as much surface, about 2,500,000,000 years will be required for it to arrive at the moon's present condition. Following out this theory, we greatly reduce the number of planets on which life is possible. In our solar system we have only the earth, possibly Venus, and, it may be, some of the satellites.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you knew nothing about. You get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart, Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended, its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation makes this remarkable compound a necessity in Canada. The Company makes sample bottles at the trifling cost of 10 cents. Sold by MACKENZIE & Co., Chatham, N. B.

Golden Ball, Shoe Store

—AND—

FURNITURE EMPORIUM.

The Golden Ball Boot and Shoe Store is the oldest established in Miramichi. It is now fifteen years since we commenced business exclusively in the above line, and we can now point with pleasure, to hosts of patrons, who have invariably, purchased from us, during that length of time. The reason is plain. We buy entirely from the best manufacturers, consequently our goods give satisfaction. We might purchase cheap, shoddy goods (that are only meant to sell and not to wear) but by pursuing that policy, it would be impossible to retain our customers. The best goods are the cheapest in the end.

We have full lines of

Infant's, Children's Misses', Youth's, Boy's Women's and Men's Boots Shoes, Slippers. etc.,

at the lowest possible price compatible with good quality.
Also a large assortment of

Trunks, Valises, and Hand Bags, Sole Leather and Shoe Findings.

Seven years ago we opened our FURNITURE EMPORIUM, and have witnessed a steadily increasing business. We keep in stock all varieties of BEDROOM, KITCHEN AND PARLOR FURNITURE, LOUNGES, SOFAS, HALL STANDS, WHATNOTS, WARDROBES, BOUQUET TABLES, SIDEBOARDS, EXTENSION TABLES, SPRING BEDS, IRON BEADSTEADS, STRETCHERS, ETC.

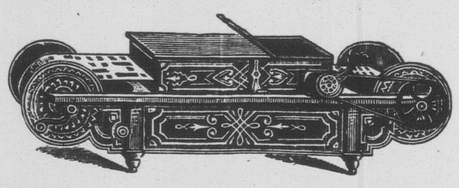
MECHANICAL ORGUINETTE.



An Automatic Reed Organ.

"THE ORGUINETTE may now be called a celebrated instrument. In tone it is akin to the Cabinet Organ, but the organ must be manipulated by an artist in order to produce music; the ORGUINETTE is on the other hand entirely mechanical in its action, and at trifling expense it can be made to furnish an unlimited supply of all kinds of music."—*Toronto Globe.*

"THE ORGUINETTE is indeed a musical wonder. It is a miniature reed organ, with as strong and melodious a tone as the Cabinet Size. It surpasses the Cabinet Organ, for the reason that the ignoramus in music can play it as well as the most accomplished professor. THE ORGUINETTE is strong and accurate in its mechanism, and consequently not liable to get out of order."—*Montreal Gazette.*

"THE ORGUINETTE is the most perfect automatic musical instrument yet invented, its repertoire is unlimited, the tone is remarkably good."—*Montreal Star.*
