The following resolution was unanimously passed by Corn Hill Division, Sons of Temerance, on Thursday evening, April 20th.
Resolved, that inasmuch as the premier of Canada has declared that the vore m favor of prohibition is insufficient to warrant the government in bringing down a bill to at once suppress, the manufacture, rale and traffic in intexticating liquor.

We, the members of Corn Hill Division, No. 576, do therefore desire to put ourselves on record as dissenting from the premier in his opinion in relation to the excidency of passing a bill in favor of prohibition, and we do this on principles of social purity and progress, believing as we to that it is curdut, as people who profess to be guided by the teaching of Christien ethics, to do all in our power, both as a political and moral duty, to remove vice and to establish virtue. Intemperance is acknowledged by all plous and intelligent people to be one of the greatest evils, if not the greatest evil, in the world, and that to suppress and crush it is the duty of all good people. We therefore wish to express our deep regret at the failure of the government in taking action to carry out the wishes of the people, considering as we do that prohibition received a good majority on September 29th (under circumstances).

Therefore, as the government refuses to

Therefore, as the government refuses to legislate on the said bill, we do submit a petition to the opposition of the government and to any members of the government intrested in the passing of the said bill, that they do make this their cause and do all in their power toward the passing of the said probability law.

A PRINCE IN THE CIRCUS RING.

The career of Prince Ghika, a scion of an old Roumanian family, is a somewhat remarkable one. The prince at an early age showed a marked tendency to Bohemian tastes. Before attaining his majority he emancipated himself from parental influences and married a circus artiste. He was disowned by his father, but on subse-quently inheriting the family estates he speedily ran through his money. He then took lessons from his wife and obtained an engagement in the circus. He has now bettered himself

The IIIs of Spring

No season of the year brings more sunshine and joy than does the glorious spring, when all nature awakens from its long winter's sleep. But as this delightful season approaches the discomforts of the body are many. After the artificial life of winter the system is run down, the blood is thin, weak, watery and diseased, and the nerves shattered and exhausted.

From IMPURE BLOOD the nerves can derive no nourishment, and in this poisoned condition the blood flows through the body to the various organs, causing the liver and kidneys to become sluggish and inactive, the heart to become weakened, and the digestive system to fail entirely in its functions.

There are headaches and backaches, nervousness and irritability, bilousness and dyspepsia, feelings of lassitude and despondency, sleeplessness, exhaustion and nervous prostration, loss of appetite, energy and ambition, brain fag, confused memory, and loss of interest

DR. A.W. CHASE'S NERVE FOOD

is prepared from the favorite prescription of Dr. A. W. Chase. It restores and revitalizes the system by supplying to the blood the very elements which make it rich, pure and healthy. This great food cure marks a new era in medicine because it builds up the wasted tissue and fills the body with the vitality which conquers disease Despair and doubt give place to hope and confidence, lassitude and despondency are replaced by ambition and happiness. The ills of spring give way to health, vigor and strength when Dr. Chase's Nerve Food

WASHINGTON, April 25. - General been without bread and meat for six weeks, and are on the verge of starvation. Gen. Fred D. Grant has reported 39 deaths from starvation in a single province. The aid the military authorities in Porto Rico were able to give the natives in the way of dis-tribution of rations and employment on the roads has been greatly reduced since the free distribution of rations was suspended and some of the Porto Rican planters and merchants devised a scheme which they believe will afford much relief to the destitute and at the same time serve them by introducing Porto Rican goods in American markets. The price of coffee in Porto Rico is very low on account of a large crop in Brazil, and CHLORODYNE they offer to contribute a large amount to be sold in this country through the agency of the Red Cross, the proceeds to go towards the relief of the distressed upon the island. The Porto Rican Steamship Co. has offered to carry these contributions free. They also offer to contribute crystal sugar, fruits, preserves, clears, clears. sugar, fruits, preserves, clgars, clgar-ettes, etc., and suggest the sale of these products at coffee rooms to be established in the principal cities by the Red Cross. They desire that these charitable contributions shall be admitted to this country free of duty.
